Central Neural Mechanisms of Cardiovascular Regulation KUNOS, CIRIELLO, 2012-12-06 With the help of recent technological advances in the study of central nervous system function important strides have been made in our knowledge regarding the pathophysiology of high blood pressure The understanding of neural mechanisms involved in the regulation of the cardiovascular system is of critical importance to the development of rational approaches to both the treatment and prevention of this disease It was in this spirit that a satellite symposium of the 13th Scientific Meeting of the International Society of Hypertension was held in June 1990 in Bethesda Maryland The chapters in this first of two volumes on the same general theme are based on lectures presented at the symposium and it is hoped that these summaries of recent research findings from prominent laboratories around the world will provide a stimulus for future research The symposium would not have been possible without generous support from the National Institute on Alcohol Abuse and Alcoholism Merck Frosst Canada G D Searle Co Squibb Institute of Medical Research Smith Kline Beecham Co Pfizer Co E I Dupont de Nemours Co Merck Sharp Dohme Co The Upjohn Co and Wyeth Ayerst Co While this volume was being prepared for publication one of its contributors Dr Michael J Brody died suddenly It is with deep sorrow and sympathy that we mourn the loss of our colleague Dr

Central Neural Mechanisms in Cardiovascular Regulation KUNOS, CIRIELLO, 2012-12-06 High blood pressure disease is one of the most prevalent pathological conditions in modern society with potentially serious consequences During the last two decades major progress has been made in the development of rational approaches to the treatment of high blood pressure A key factor in this progress has been an increase in our understanding of how the brain controls blood pressure The chapters in the present book together with those in a previous volume provide a broad overview of recent progress in our knowledge of the central neural mechanisms involved in the regulation of the cardiovascular system It is our hope that these essays by leading experts in the field will not only provide a useful source of information but will also stimulate inquiry
