Elites in Transition Heinrich Best, Ulrike Becker, 2013-11-11 Who rules in Eastern Europe became a fundamental question for western researchers and other observers after communist regimes were established in the region and it gained further importance as state socialism expanded into Central Europe after the Second World War A political order which according to Leninist theory of the state and to subsequent Stalinist political practice was primarily a highly centralised and repressive power organisation directed as if it were natural researchers attention towards the highest echelon of office holders in party and state Extreme centralisation of power in these regimes was consequently linked to an elitist approach to analysing them from a distant viewpoint It is one of the many paradoxes of state socialism that a social and political order which presumptuously claimed to be the final destination of historical development and to be based on deterministic laws of social evolution which claimed an egalitarian nature and denied the significance of the individual was perceived through the idiosyncrasies rivalries and personal traits of its rulers The largest part of these societies remained in grey obscurity only occasionally revealing bits of valid information about a social life distant from the centres of power It is debatable whether this top headedness of western research into communist societies created a completely distorted picture of reality however it certainly contributed to an overestimation of the stability of these regimes an underestimation of their factual diversity and a misjudgement of the extent of conflicts and cleavages dividing them

Restructuring of the Economic Elites after State Socialism Jochen Tholen, David Lane, Gyorgy Lengyel, 2012-02-24 The

collapse of the former socialist states has led to the transformation of their political economic and social systems as well as a major change in international orientations. In this context new economic and political elites of the former state socialist societies have emerged. How they have emerged from state socialism is a major component of this book which has two major themes. First we consider the recruitment patterns of the new elites among others the extent to which the new leaderships have been reconstituted from the former cadres of state socialism. Second we outline the consequences of transformation on the institutions particularly the formation of markets and privatisation in the context of the dynamic of the enlargement of the European Union and the entry of the new states into the world system. This collection of papers is based mostly on two conferences out of six serial conferences under the general responsibility of David Lane Cambridge University. The first conference was held in Budapest on 4-5 September 2004 at Corvinus University of Budapest Institute of Sociology and Social Policy Centre for Empirical Social Research and organized by György Lengyel the second on 13-14 May 2005 at University of Bremen Institute of Sociology Institute Labour and Economy led by Jochen Tholen.

Elite Mobilities Thomas Birtchnell, Javier Caletrío, 2013-08-22. Small in number but great in influence mobile elites have shaped the contours of global capitalism. Today these elites continue to flourish globally but in a changing landscape. The current economic crisis and rising concerns about the moral legitimacy of extreme wealth coincides with stern warnings over the risks posed by climate change and the unsustainable use of resources. Often an out of bounds topic in critical social science elites are thought of as too inaccessible a group to interview and too variable a minority to measure. This groundbreaking collection sets out to challenge this perception. Through the careful examination of the movements of the one per cent through the everyday spaces of the ninety nine per cent *Elite Mobilities* investigates the shared zones elites inhabit alongside the commons the executive lounge in the airport the penthouse in the hotel or the gated community next to the slum. Bringing together the pioneer scholars in critical sociology today this collection explores how social scientists can research map and track the flows and residues of objects wealth and power surrounding the hypermobile. *Elite Mobilities* sets a new benchmark in social science efforts to research the powerful and the privileged. It will appeal to students and scholars interested in mobilities transport tourism social stratification class inequality consumption and global environmental change.

communist rule that helped prepare it for a market orientated economy transition and political pluralism Regionalism versus Multilateral Trade Arrangements Takatoshi Ito, Anne O. Krueger, 2007-12-01 There is no doubt that the open multilateral trading system after World War II was a key ingredient in the rapid economic development of the entire world. Especially in Hong Kong, Korea, Singapore and Taiwan, exports increased dramatically both in absolute terms and as a percentage of GNP. In the 1980s, however, preferential trading arrangements (PTAs) began to emerge as significant factors affecting world trade. This volume contains thirteen papers that analyze the tensions between multilateral trading systems and preferential trade arrangements and the impact of these tensions on East Asia. The first four chapters introduce PTAs conceptually and focus on the unique political issues that these agreements involve. The next five essays present more direct empirical analyses of existing PTAs and their economic effects primarily in East Asia. The last four papers concentrate on the outcomes of individual East Asian nations' trading policies in specific instances of preferential agreements. **The Holocaust and the German Elite** Rainer C. Baum, 2021-11-21 This book, first published in 1981, is a study of the social and political sources of amoral political rule in modern times. Only a moral indifference unparalleled in history made the Holocaust possible, and by linking the German imperial ambitions to the meaningless suffering and death in the concentration camps, the true significance of the Holocaust is revealed in all its horror. Understanding this requires an understanding of the social forces that produced a national amorality among Germany's elites. The author suggests three contributive causes: a marked ambiguity among Germans in their attitude towards social values, the development of a cadre characterized by status insecurity, and an inability to resolve internal conflict.
