The New Cold War and the Remaking of Regions T.V. Paul,Markus Kornprobst,2025-07-01 A compelling examination of how secondary states are preserving their strategic autonomy and are resisting spheres of influence Russia s invasion of Ukraine and the deteriorating United States China relationship signify the onset of the New Cold War Unlike the original Cold War this competition is multipolar and multiplex with secondary powers small states and even nonstate actors pragmatically selecting which of their interests intersect with those of the great powers The New Cold War and the Remaking of Regions contends that multiplexity and multipolarity have important repercussions for the world s regional orders Contributors to the book address the New Cold War and regional ordering processes from realist liberal and

constructivist perspectives They demonstrate how variable regional dynamics will lead either to peaceful change or conflict This volume is part of a new wave of scholarship that expands the focus of international relations beyond great powers and recognizes the increasing agency that other states have gained in the twenty first century world order *The Unfinished Quest* T. V. Paul,2024 In *The Unfinished Quest* leading international relations and South Asia scholar T V Paul charts India s cumbersome path toward higher regional and global status covering both the successes and failures it has experienced since the modern nation s founding in 1947 Paul focuses on the key motivations driving Indian leaders to enhance India s global status and power but also on the many constraints that have hindered its progress Paul s analysis of India s quest for status also sheds important light on the current geostrategic situation and serves as a new framework for understanding the China India rivalry as well as India s relative position in the broader Indo Pacific theater *The New Regional Politics of Development* Anthony Payne,2019-08-09 *The New Regional Politics of Development* assesses the various development strategies being pursued in each of the major regions of the world While huge inequalities in wealth and capacity remain a hallmark of the twenty first century world order the contributors argue that hard and fast distinctions between developed and developing states are outdated and inhibit our understanding of the real relationships and dynamics at work

aberrations from the Western models fails to acknowledge their inherent strategic character of adapting Western concepts to meet local requirements Drawing on multiple disciplines concepts and contexts in India and China the book makes a valuable contribution to the theory and practice of politics as well as to International and Asian Studies **China in World Politics**
