offers a fresh look at Verdun one of the longest and bloodiest battles of the First World War in a book that will surely become the standard work on the topic United States Department of State Treaties in Force; A List of Treaties and Other International Agreements of the United States in Force on January 1, 2018 , **The Battle of London** Frédéric Bastien, 2014-10-01 A bestseller in Quebec that describes the horse trading intrigue and unrest behind Trudeau's quest to repatriate the Constitution After the referendum in 1980 Pierre Elliott Trudeau turned his sights on repatriating the Constitution in an effort to make Canada fully independent from Britain What should have been a simple process snowballed into a complicated intrigue Quebec which thought its prerogatives would be threatened if the Constitution were repatriated mounted a charm offensive replete with fine dining and expensive wines in order to influence key British MPs Not to be outdone Canada's native leaders who felt betrayed by the British Crown decided to enter the fray determined to ensure that their cause would triumph The English Labour Party had a view on the matter as well which chiefly involved embarrassing Prime Minister Thatcher as thoroughly as possible Historian Frédéric Bastien describes with great flair how the maverick Trudeau and the uncompromising Thatcher entered into one of history's most unlikely marriages of convenience in order to repatriate the Canadian Constitution Bibliography and Index of Geology , 1987 *Liberal Protectionism* Vinod K. Aggarwal, 2024-06-12 What does organized trade portend for the future of the post World War II trading order Are we seeing a transition from liberalism to protectionism These questions are central to Vinod K Aggarwal's penetrating analysis of conflict and cooperation in trade among developed and less developed countries In his examination of the evolution of organized trade Aggarwal specifically analyses international regimes in textile and apparel trade The author uses an original theoretical approach to investigate international regimes Why are regimes desirable Aggarwal shows how such accords can protect broader arrangements allow countries to control one another's behavior and minimize information and organization costs in negotiations Several factors account for the form of regimes The strength of regimes is enhanced by an asymmetry of international power A hegemon is more willing and able to maintain a regime Both the nature and scope of regimes are determined by the relative degree of trade competition and cognitive consensus among actors As trade competition increases and actors decide to link related issues regimes become more protectionist in their goals and wider in their coverage Aggarwal's theory successfully accounts for the transformation of international regimes in textile trade demonstrating the importance of systematically incorporating international level factors into our theories His empirical work is based on extensive archival research and interviews with key negotiators Aggarwal concludes that the pattern of international cooperation which evolved in textile trade provides a portrait of the future for trade in other industrial sectors He finds the trend of arrangements in textile trade disturbing and argues that organized trade will not prevent and may in fact promote a slide from liberalism to protectionism Regimes originally developed to counter protectionism may evolve into systems of organized protection that encourage neither efficiency nor equity A lucid analysis of recent historical developments in textile

trade this study sheds light on the movement toward increasing protection in other sectors of trade as well. France since the 1970s Emile Chabal, 2014-12-18. Until the mid 20th century France saw itself as a great power with universalist aspirations and global ambitions. But the Second World War and decolonisation irrevocably changed France's place in the world. Despite attempts to restore the country's grandeur in the 1960s the French have been forced to reconcile themselves to their modest place at the heart of a changing Europe. What impact has this had on political life? How have the French reimagined the revolutionary republican and reactionary ideologies that have been so crucial to their history? How has the arrival of hundreds of thousands of postcolonial migrants transformed politics? These are just some of the questions at the heart of France since the 1970s. With contributions from leading specialists on topics as varied as the legacy of empire and neo-liberalism it explores how the French have dealt with the pervasive sense of uncertainty that has become a defining feature of contemporary European politics.

The Duty of Memory Sébastien Ledoux, 2025-07-01. Within France the expression duty of memory (*le devoir de mémoire*) speaks to a complex and ever-evolving relationship with the past. Emerging in the 1970s this term raised questions about memorialization which dominated public debates in the 1990s highlighting France's entanglements with colonialism and the Holocaust. Drawing on a variety of interviews, archival sources and data surveys author Sébastien Ledoux spotlights how the trajectory of this term offers a lens for understanding contemporary societies' relationship with the past on a global scale.

Excessive Maritime Claims J. Ashley Roach, Robert W. Smith, 2012-06-22. Now in a third revised edition *Excessive Maritime Claims* by J. Ashley Roach and Robert W. Smith is designed for law of the sea and maritime law specialists. The book draws on published governmental material in the public domain, specifically the U.S. and addresses recent progress in maritime security, proliferation of weapons of mass destruction by sea piracy and protection of underwater cultural heritage. As a result of significant developments in the law of the sea primarily with reference to the 1982 Law of the Sea Convention *Excessive Maritime Claims* provides up-to-date coverage of current affairs as well as introduces new topics such as submarine cables, polar areas, environmental protection, sovereign immunity and sunken ships and maritime law enforcement.

Routledge Library Editions: Historiography Various, 2021-06-23. The greatest problem in historical scholarship, theoretically and practically, is the relation between historians and their subject matter. The past is gone and historians can only study its remnants. On what basis do scholars select certain facts from the mass of data left from the past? How do they explain the interrelationship of the facts they select? What criteria do they use to evaluate their subject? The 35 volumes in this set originally published between 1926 and 1990

discuss and answer these essential questions faced by historians The development of historical understanding during the 18th and 19th centuries was one of the most striking features of Western culture Both historiography and historical thinking advanced as never before The historical movement of the 19th century was perhaps second only to the scientific revolution of the seventeenth century in transforming Western thought One consequence was extensive organisation and professionalization of research which the volumes in this set reflect

Between Memory and History Marie Noelle Bourguet, Lucette Valensi, Nathan Wachtel, 2016-03-31 The recent wave of interest in oral history and return to the active subject as a topic in historical practice raises a number of questions about the status and function of scholarly history in our societies This articles in this volume originally published in 1990 and which originally appeared in History and Anthropology Volume 2 Part 2 discuss what contributions meanings and consequences emerge from scholarly history turning to living memory and what the relationships are between history and memory
