*State Transformations: Classes, Strategy, Socialism*, 2021-07-05 It is often remarked that critical and especially Marxist state theory began to lose its central place in the study of comparative politics in the 1980s Ironically this shift occurred just as neoliberal policies were transforming the social form and spatial scales of the state radically restructuring the practices of state economic intervention and extending the capabilities of the coercive arms of the state This volume addresses the impoverishment of state theory over the last decades and insists on the continued salience of class analysis to the study of states The book's title State Transformations reflects several central themes in the comparative study of states the neoliberal restructuring of capitalist states the changing economic and political architecture of imperialism and the prospects of a democratic transformation of capitalist states The essays collected here on these themes are in honor and memory of Leo Panitch whose influential body of work has shaped debates on the state imperialism and socialism over the past four decades

**BRICS** Patrick Bond, Ana Garcia, 2015-08-20 The rise of the BRICS a bloc of emerging economies comprised of Brazil Russia India China and South Africa is one of the defining features of the modern global economy This book explores these nations which seem to be growing at a much faster rate than the developed nations of the Eurozone and North America Will they drag the developed world out of the economic mire Will they force social change and innovation into the tired old world order And politically do they herald a new dawn for democracy or do they represent a continued political repression This edited collection answers these questions by offering critical analysis of the rise of the BRICS economies within the framework of a predatory exclusionary and unequal global capitalism From Chinese oil geopolitics to the ruinous mega events in Brazil the authors provide a new radical way of understanding these controversial developments

[La construcción del capitalismo global](#) Leo Panitch,Sam Gindin,2015-11-27 The all encompassing embrace of world capitalism at the beginning of the twenty first century was generally attributed to the superiority of competitive markets Globalization had appeared to be the natural outcome of this unstoppable process But today with global markets roiling and increasingly reliant on state intervention to stay afloat it has become clear that markets and states aren t straightforwardly opposing forces In this groundbreaking work Leo Panitch and Sam Gindin demonstrate the intimate relationship between modern capitalism and the American state including its role as an informal empire promoting free trade and capital movements Through a powerful historical survey they show how the US has superintended the restructuring of other states in favor of competitive markets and coordinated the management of increasingly frequent financial crises
