Nunggubuyu Dictionary Jeffrey Heath, 1982 Nunggubuyu English dictionary with English Nunggubuyu index and thesaurus notes on lexicon style ethnobotany tape catalogue place names maps of mythical events **Handbook of Australian Languages** R.M.W. Dixon, Barry J. Blake, 1983-12-31 This handbook makes available short grammatical sketches of Australian languages Each grammar is written in a standard format following guidelines provided by the editors and includes a sample text and vocabulary text The contributions to this volume are salvage studies giving all the information that is available on four languages which are on the point of extinction and an assessment of what linguistic impressions can be inferred from the scant material that is available on the extinct languages of Tasmania **The Oxford Guide to Australian Languages** Claire Bowern, 2023 This book is a wide ranging reference work covering the more than 550 Indigenous languages of Australia The chapters in the book explore typology and classification linguistic structures sociolinguistics and language variation and language in the community The final part offers sketches of a selection of languages sub groups and families The Language of Hunter-Gatherers Tom Güldemann, Patrick McConvell, Richard A. Rhodes, 2020-02-27 Offers a linguistic window into contemporary hunter gatherer societies looking at how they survive and interface with agricultural and industrial societies *Verb Classification in Australian Languages* William B. McGregor, 2013-06-10 This book deals with systems of verb classification in Australian Aboriginal languages with particular focus on languages of the north west It proposes a typology of the systems according to their main formal and semantic characteristics It also makes some proposals concerning the historical origins and grammaticisation of these systems and suggestions regarding the grammatical relations involved In addition an attempt is made to situate the phenomenon of verb classification within the context of related verbal phenomena such as serial verb constructions nominal incorporation and complex predicates **The Dynamics of Nominal Classification** Ruth Singer, 2016-02-22 The use of grammatical gender in the Australian language Mawng calls into question prevailing ideas about the functions of nominal classification systems Mawng s gender system has a strong semantic basis and plays an important role in the construction of meaning in discourse Gender agreement in verbs is frequently lexicalized creating idioms called lexicalised agreement verbs that are structurally similar to noun verb idioms This book will be of interest to anyone interested in nominal classification or cross linguistic approaches to idioms *Australian Aboriginal Grammar (RLE Linguistics F: World Linguistics)* Barry Blake, 2014-01-10 This study covers a number of topics that are prominent in the grammars of Australian Aboriginal languages especially ergativity and manifestations of the hierarchy that runs from the speech act participants down to inanimates This hierarchy shows up in case marking number marking and agreement advancement and cross referencing Chapter 1 provides an overall picture of Australian languages Chapters 2 3 and 4 deal with case systems including voice alternations and other advancements Chapter 5 deals with the distribution of case marking within the noun phrase Chapter 6 deals with systems that allow the cross referencing of bound pronouns

Chapter 7 deals with clauses which appear to have more than one verb Chapter 8 deals with compound and complex sentences Chapter 9 deals with word order and emphasises a theme introduced in Chapter 5 namely the widespread use of discontinuous phrases Chapter 10 draws together ergativity and various manifestations of the hierarchy and attempts to interpret their distribution The final section provides an interesting hypothesis about the evolution of core grammar in Australia

The Lexical Typology of Semantic Shifts Päivi Juvonen, Maria Koptjevskaja-Tamm, 2016-08-08 The volume focuses on semantic shifts and motivation patterns in the lexicon Its key feature is its lexico typological orientation i e a heavy emphasis on systematic cross linguistic comparison The book presents current theoretical and methodological trends in the study of semantic shifts and motivational patterns based on an abundance of empirical findings across genetically areally and typologically diverse languages

Catching Language Felix K. Ameka, Alan Dench, Nicholas Evans, 2008-08-22 Descriptive grammars are our main vehicle for documenting and analysing the linguistic structure of the world's 6 000 languages They bring together in one place a coherent treatment of how the whole language works and therefore form the primary source of information on a given language consulted by a wide range of users areal specialists typologists theoreticians of any part of language syntax morphology phonology historical linguistics etc and members of the speech communities concerned The writing of a descriptive grammar is a major intellectual challenge that calls on the grammarian to balance a respect for the language's distinctive genius with an awareness of how other languages work to combine rigour with readability to depict structural regularities while respecting a corpus of real material and to represent something of the native speaker's competence while recognising the variation inherent in any speech community Despite a recent surge of awareness of the need to document little known languages there is no book that focusses on the manifold issues that face the author of a descriptive grammar This volume brings together contributors who approach the problem from a range of angles Most have written descriptive grammars themselves but others represent different types of reader Among the topics they address are overall issues of grammar design the complementary roles of outsider and native speaker grammarians the balance between grammar and lexicon cross linguistic comparability the role of explanation in grammatical description the interplay of theory and a range of fieldwork methods in language description the challenges of describing languages in their cultural and historical context and the tensions between linguistic particularity established practice of particular schools of linguistic description and the need for a universally commensurable analytic framework This book will renew the field of grammaticography addressing a multiple readership of descriptive linguists typologists and formal linguists by bringing together a range of distinguished practitioners from around the world to address these questions

Nominal Classification in Aboriginal Australia Mark Harvey, Nicholas Reid, 1997-09-02 This volume aims to extend both the range of analyses and the database on nominal classification systems Previous analyses of nominal classification systems have focussed on two areas the semantics of the classification system and the role of the system in discourse In many nominal classification systems

there appear to be a significant percentage of nominals with an arbitrary classification There is a considerable body of literature aimed at elucidating the semantic bases of classification in such systems thereby reducing the degree of apparent arbitrariness Contributors to this volume continue this line of enquiry but also propose that arbitrariness in itself has a role from a wider socio cultural perspective Previous analyses of the discourse role of classification systems posit that they play a significant role in referential tracking For the languages surveyed in this volume contributors propose that reference instantiation is an equally significant function and indeed that reference instantiation and tracking cannot be properly divided from one another This volume provides detailed information on classification in a number of northern Australian languages whose systems are otherwise poorly known Routledge Library Editions: Linguistics Various, 2021-12-02

providing useful guidance for further research The author often draws on his own experience of documenting endangered languages and of language revival activities in Australia The volume is of interest to a wide readership including linguists anthropologists sociologists and educators **An Ethnography of Stress** V. Burbank,2011-01-31 Health inequality is a global issue This book examines the problem through an in depth look at a remote Australian Aboriginal community characterized by a degree of premature morbidity and mortality similar to that in other disadvantaged populations Its synthesis of cognitive anthropology with frameworks drawn from epidemiology evolutionary theory and social psychological and biological sciences illuminates the actions emotions and stresses of daily life While this analysis implicates structures and processes of inequality in the genesis of ill health its focus remains on the people who suffer grieve and live with the dilemmas of an intercultural life Nunggubuyu Dictionary Michael R.
