Older People and Mental Health Nursing Rebecca Neno, Barry Aveyard, Hazel Heath, 2008-04-15 Older People and Mental Health Nursing provides an evidence based guide to caring for the growing number of older people with mental health issues. It focuses on the knowledge and key skills which practitioners require to work effectively with older people who have or are at risk of developing mental health needs. Divided into five sections, Older People and Mental Health Nursing first explores the background, historical perspectives and influences on mental health care in later life. It then looks at the ethical and legal issues involved, therapeutic relationships and the values underpinning support and care. Part three focuses on aspects which have traditionally been neglected in mental health care, including culture, religion and sexuality. Part four details specific mental health issues for older people, including delirium, depression and dementia. The final section explores future trends in older people's mental health and offers ideas on how nursing is developing and could develop to address these. Offers a practical evidence based guide to the care of older people with mental health conditions. Includes thought provoking practice examples throughout. Contains guidelines for nursing practice, therapeutic interventions. Includes case studies and reflective scenarios. Written by experts in the field.

Critical Care Nursing of Older Adults Marquis D. Foreman, Terry T. Fulmer, Koen Milisen, 2009-11-16 2010 AJN Book of the Year Award Winner in Critical Care Emergency Nursing. Designated a Doody's Core Title. This evidence based book is an excellent reference for ensuring high quality management of the elderly and of their particular needs in the critical care setting. AJN. This book's contents run the gamut of elder problems and care: physiology, pharmacology, nutrition, restraints, substance abuse. It is a compendium that can be used as a text or a resource. Claire M. Fagin PhD RN FAAN From the Foreword. This book is an evidence based best practices guide that directs the bedside care of critically ill elders. The book serves as a reference on major clinical issues for nurses working at the forefront of care, from nurses in critical care and step down units to those in trauma and emergency departments. Nurse educators at all degree levels will also find this book to be useful as a textbook and resource for students. The authors provide evidence based practical guidelines for both the complex clinical and management aspects of care. The book offers comprehensive coverage of all the issues caregivers need to be up to date on, including the standards of practice for geriatric care, new technologies, pharmacotherapy, pain management, issues, ethical issues and much more. Key topics discussed: Strategies for patient safety for older patients in the intensive care setting. Family responses to critical care of the older adult. Infection, sepsis and immune function. Understanding and managing sleep disorders in older patients in the ICU. Heart failure in the critically ill older patient. Substance abuse and withdrawal in elderly patients.

Geriatrics Models of Care Michael L. Malone, Marie Boltz, Jonny Macias Tejada, Heidi White, 2024-05-30 Following the success of the previous edition, the second edition of *Geriatrics Models of Care* is the definitive resource for systems based practice improvement for the care of older

adults Several new models of care have been published in the last eight years new outcomes have emerged to better understand the impact of existing models and with the rise of the Age Friendly Health Systems movement promoting organized efforts to prepare our health care settings for older individuals is of more importance than ever The second edition is organized based on the practice setting along a continuum of care hospital transitions from hospital to home outpatient settings and the emergency department This book also highlights long term care models which is an important part of the continuum of care for older Americans Further this edition features models that address the needs of vulnerable populations This new section will describe a spectrum of programs for older adults who have Alzheimer s disease or Parkinson s disease Other models describe best practices for older adults undergoing surgery or those who want to remain functioning independently in their home A defining feature of this book is that each chapter follows a standard template 1 the challenge which led to the model 2 the patient population served 3 core components of the intervention 4 the role of interdisciplinary health professionals 5 evidence to support the intervention 6 lessons learned in the implementation and dissemination of the model 7 implications for family caregivers and communities particularly underserved and diverse communities and 8 how each model will provide care across the continuum during an entire episode of care In addition each chapter features a call out box with practical tips for implementing the model
