

Nursing Theories List

Nursing theories list serves as a reference tool for nurses, educators, researchers, and students to explore and understand the foundational concepts and perspectives that shape the nursing profession.

Grand theories

Nursing theory	Founder/ Developer	Year developed	Main concepts/Principles
Theory of human caring	Jean Watson	1979	Emphasizes the importance of the nurse-patient relationship and caring as central to nursing practice. Focuses on promoting healing through authentic presence, compassionate care, and therapeutic touch.
Theory of health as expanding consciousness	Margaret A. Newman	1970s	Explores the concept of health as a process of expanding consciousness, transcending illness to achieve higher levels of awareness and well-being. Emphasizes the interconnectedness of mind, body, and spirit in the healing process and the importance of holistic nursing care.
Behavioral system model	Dorothy E. Johnson	1959	Views individuals as behavioral systems, seeking balance and equilibrium. Emphasizes nursing interventions aimed at helping individuals maintain stability in their biological, psychological, and social domains.

Middle-range theories

Nursing theory	Founder/ Developer	Year developed	Main concepts/Principles
Theory of comfort	Katherine Kolcaba	1990s	Its primary objective is to provide clients with comfort, aiming to initiate three stages of comfort: relief, ease, and transcendence.
Self-care deficit theory	Dorothea Orem	1950s to 2001	Centers on the concept that patients desire to care for themselves but may require assistance. Nurses empower patients to perform self-care activities independently, gradually transitioning them towards increased autonomy as they progress.
Theory of goal attainment	Imogene M. King	1960s	Focuses on the nurse-patient relationship and the mutual goal-setting process to achieve optimal health outcomes. Emphasizes the importance of communication, interaction, and goal clarity in facilitating goal attainment.

Nursing Theories And Quality Of Care:

Nursing Theories and Quality of Care Hugh P. McKenna, 1994 Each nursing model incorporates specific views on four value laden components nursing person health environment In part two of the study an action research approach was used to implement the Human Needs Model HNM on a long stay psychiatry ward Within a broader quasi experimental design selected quality of care indicators were appraised before and after the implementation of the model These dependent variables were also monitored on a control ward Data were collected on both wards at one pretest and two posttest points using a triangulation of mostly quantitative research methods The research instruments Delphi Technique used emanated from the literature and the field work lasted nearly nine months

Nursing Theories and Models Hugh

McKenna, 2006-09-07 Nursing theory is a major part of all nursing courses and nurses are encouraged to use theories in practice but it is not always easy for the student to make a real connection between the two Drawing on many years experience of teaching and research Hugh McKenna addresses the theory needs of both students and qualified staff He demystifies the confusing terminology associated with nursing theory and shows how all nurses can build theory from practice through reflection and analysis This text offers step by step guidelines on how to analyse concepts how to generate and select theory how to apply and test theory in practice Written in a friendly easy to read style *Nursing Theories and Models* puts forward realistic strategies for bridging the theory practice gap
