## **Nursing Informatics:**

**Introduction to Nursing Informatics** Kathryn J. Hannah, Marion J. Ball, Margaret J.A. Edwards, 2013-04-17 This series is intended for the rapidly increasing number of health care professionals who have rudimentary knowledge and experience in health care computing and are seeking opportunities to expand their horizons It does not attempt to compete with the primers already on the market Eminent international experts will edit author or contribute to each volume in order to provide comprehensive and current accounts of innovations and future trends in this quickly evolving field Each book will be practical easy to use and well referenced Our aim is for the series to encompass all of the health professions by focusing on specific professions such as nursing in individual volumes However integrated computing systems are only one tool for improving communication among members of the health care team Therefore it is our hope that the series will stimulate professionals to explore additional means of fostering interdisciplinary exchange This series springs from a professional collaboration that has grown over the years into a highly valued personal friendship Our joint values put people first If the Computers in Health Care series lets us share those values by helping health care professionals to communicate their ideas for the benefit of patients then our efforts will have succeeded Nursing Informatics Marion J. **The Nursing Informatics Implementation Guide** Eleanor Callahan Hunt, Sara Breckenridge Sproat, Rebecca Rutherford Kitzmiller, 2013-03-09 Health institutions are investing in and fielding information technology solutions at an unprecedented pace With the recommendations from the Institute of Medicine around information technology solutions for patient safety mandates from industry groups such as Leapfrog about using information systems to improve health care and the move toward evidence based practice health institutions cannot afford to retain manual practices The installation of multi million dollar computerized health systems represents the very life blood of contemporary clinical operations and a crucial link to the financial viability of institutions Yet the implementation of health information systems is exceptionally complex expensive and often just plain messy The need for improvement in the art and science of systems implementation is clear up to 70 80% of information technology installations fail The reasons are multifaceted ranging from the complexity of the diverse workflows being computerized the intricate nature of health organizations the knowledge and skills of users to other reasons such as strategies for obtaining key executive support weaving through the politics peculiar to the institution and technical facets including the usability of systems Thus the art and science of successfully implementing systems remains deeply layered in elusiveness Still given the pervasiveness of system implementations and the importance of the outcomes this is a critical topic especially for nurses and informatics nurse specialists
