

number of very provocative points that call for considerably more examination by scholars of the Middle East. Thus, for example, Ramazani contends that the pattern of influence between Washington and Tehran was not unidirectional in favor of the former, but was reciprocal and issue specific. Furthermore, he contends that the Shah was not some puppet manipulated by the White House to serve American ends. Rather, the pattern of influence sometimes led to American foreign policy taking a direction that served Iranian interests as well as Washington's.

Much of this monograph is essentially ideographic, tracing the "patterns of influence" between the U.S. and Iran in terms of four main issue areas: oil, security and arms transfers, economic development, and political continuity and change. This reviewer found these chapters insightful and reflective of Ramazani's remarkable insight and comprehensive understanding of Iranian society. Unfortunately the edition is flawed by some typographical errors that could mislead readers, a particularly important point if used for an undergraduate class. Thus, on page 28 (regarding oil revenues) and on page 47 (regarding arms sales) what should read *billions* only reads millions.

After an introductory chapter in which Ramazani traces the Shah's efforts to forge an "alliance" with the United States (a goal he sought unsuccessfully throughout his reign), the author shows in a chapter on oil influence how the Shah sought to involve (successfully this time) American oil companies in Iranian oil production. The Shah then strove to maximize Iran's oil revenues and was the primary party responsible for the push in OPEC oil revenues beginning with the 1971 Tehran conference, as well as in the subsequent years. The Shah needed the increased revenue to purchase the massive arms needed to make Iran a major world military power. Additionally, Iran was striving for dramatic economic development (oversimplified by American policymakers and Iranian technocrats as mere economic growth). Both of these goals were strongly supported by Washington, especially after the Nixon Doctrine supported Iran's quest to be the Gulf's "policeman."

But American endorsement of Iran's military buildup and her impressive economic growth obfuscated the fact that there existed a strong bias against any genuine and fundamental economic or political change taking place in Iran. In two chapters chronicling the growth of opposition to the Shah and America's role in the Iranian Revolution, Ramazani identifies what he considers to be the major flaws in U.S. policy towards Iran during this period. The United States has never understood the complex subtleties of superpower-

client state relationships, particularly when the latter is an LDC. Washington's emphasis on strategic considerations, and the American penchant for equating growth with development, operate to give inadequate attention to the deep sensitivities marking the political culture of a country such as Iran. Here Ramazani is at his best, scorning American policymakers for relying too heavily on Western-trained Iranian technocrats for an accurate definition of the situation when such Iranians have lost touch with their own culture (they are the "neither here nor there" group); but in this case, where does one put Ramazani? At least three times in this short book he notes how the American military's "status of forces agreement" with Iran was "culturally insensitive," recalling in Iranian minds the hated capitulatory system. True, but was a realistic alternative available in the American mind?

Oil and Turmoil: America Faces OPEC and the Middle East. By Dankwart A. Rustow. (New York: W.W. Norton, 1982. Pp. 320. \$14.95.)

This study analyzes the U.S. oil policy in terms of the interplay between four main factors: Soviet expansion, imperialism versus nationalism, the Arab-Israeli dispute, and the price and supply of oil. The central thesis is that American policies towards these issues "were fraught with numerous inconsistencies and latent contradictions" (p. 76).

To thwart Soviet penetration, the U.S. envisioned ringing the USSR by a *cordon sanitaire* of friendly, pro-Western Middle Eastern countries. Yet, from John Foster Dulles's Baghdad Pact to Alexander Haig's strategic consensus, such efforts to subsume regional conflicts under the rubric of East-West struggle manifested "many dangers of oversimplification" (p. 251). Thus, as Rustow explains, Washington's strong support for Israel strained its relations with the Arab world and led some of the Arab countries to look towards Moscow for economic and military assistance. Thus, the Soviets, along with the U.S., were soon to become key players in Middle Eastern affairs.

Concerning the 1973 to 1974 oil embargo, Rustow emphasizes (p. 152) that it was "not unnatural" for the Arabs to use the oil weapon against the U.S., the major supporter and provider of their enemy, Israel. Moreover, the embargo materialized only when it became evident that repeated calls for an evenhanded
