Development in Africa and the Middle East Khadija Darmame, Eric Ross, 2024-07-25 This edited volume surveys how current local governance policies and development strategies across Africa and the Middle East are advancing Sustainable Development Goals (SDGs). Morocco's recent experience with local development strategies serves as a starting point for the discussion. Over the past decade, Morocco has undertaken a variety of initiatives aimed at reducing poverty and social inequalities and providing essential services to marginalized communities. These initiatives provide great opportunities to reshape the spatial organization of regions and to address chronic local issues of infrastructure and investment. Local governance is the most direct way of providing basic services to populations, helping to alleviate socio-spatial inequalities. Also, it is and will continue to be the best way to engage people and local governments in economic, social, and human development agendas. However, placing local governance at the heart of development strategies requires going well beyond participatory approaches to policy making. Local communities and their governments need to be empowered. As responses to the Covid-19 epidemic have laid bare, new and more efficient modes of territorial governance are needed at local and regional levels if current global-scale challenges are to be met. While development and governance strategies like Morocco's are framed by global agreements and standards, there is a need to understand them at the regional scale. Are there discernible patterns in how African and Middle Eastern countries design and implement them? This volume assembles case studies from across the region, allowing for understandings that transcend the usual spatial dichotomies between North and Sub-Saharan Africa, between Africa and the Middle East, and between the Anglophone and Francophone spheres. The volume builds upon an international conference on the topic held at Al Akhawayn University in Ifrane, Morocco, in February of 2022. The volume is aimed at a readership of researchers and development practitioners and will be of most direct benefit to advanced undergraduate and graduate-level students.

OPEC Mohammed E. Ahrari, 2014-10-17 A glut of oil, dropping prices, the threat of insolvency, a divided membership: these developments in the early weeks of 1985 underline the cogency of Mohammed Ahrari's historical study of the OPEC oil cartel and his argument that economic forces, not politics, determine OPEC's action in the world arena. The impetus for the formation of OPEC in 1960 was the desire of the oil-producing states for greater income from their most valuable resource. The international oil corporations had secured lucrative concessions early in this century, and in the 1960s they still dictated both the terms of production and the prices paid to the oil states. In the buyers' market of the 1960s, the organization found itself with little economic clout. But in the early 1970s, OPEC members succeeded not only in manipulating the price of crude oil but in reducing the status of the oil corporations to that of mere managers of upstream operations. In addition, they accumulated enormous numbers of petrodollars by exploiting increasingly tight markets in the aftermath of the oil embargo of 1973 and the Iranian revolution in 1979. The effects of OPEC policies on the consuming countries have been skyrocketing inflation and sustained recession with profound political repercussions. But the OPEC members have found their apparent power an uncertain blessing, as Mr. Ahrari demonstrates. Their failure to

develop pricing formulas sensitive to fluctuations in the international oil market have made them highly vulnerable In addition the political tensions emanating from the Iran Iraq war and from the specter of repetition of Iranian style revolution elsewhere in the Persian Gulf have made OPEC s continued viability highly uncertain **Hearings** United States. Committee on Foreign Relations,1972 Oil and the Arab region development Kamal Saliba Sayigh,1967 The Arabs' New Frontier Robert Stephens,2019-07-16 This book explores the Arab world and its development problems as its new oil wealth opens up prospects of accelerated economic and social progress It describes Kuwait s aid operations and looks at the effect the sudden torrent of oil money has had on the Kuwaitis
