

THE PHILOSOPHY OF THE AUSTRIAN SCHOOL

In recent years the Austrian School has been an important contributor to the social sciences. In spite of this significant input, however, attempts to understand it have remained locked in a polemical frame.

The Philosophy of the Austrian School challenges this approach. Raimondo Cubeddu presents a philosophically-based account of the School's methodological, political and economic ideas. While acknowledging the evident divergences between the key figures, the study traces important similarities between Menger, Mises and Hayek. In particular, the work examines their shared conviction that the theory of subjective value and notions of spontaneous order would revolutionize the philosophical premises of the social sciences and the very basis of political philosophy. In analysing the course of thought, the author establishes that the unity of the Austrian School was based on a shared theory about the limits of human knowledge. Drawn together, this theory constitutes one of the most seminal avenues of research in the social sciences and a major reformulation of liberal ideology. Unlike most literature in this area, the book is largely free of overly technical economic language and provides a single coherent perspective on the wider Austrian movement.

Was Ludwig von Mises a Conventionalist? Alexander Linsbichler, 2017-06-08 This book presents a concise introduction to the epistemology and methodology of the Austrian School of economics as defended by Ludwig von Mises The author provides an innovative interpretation of Mises arguments in favour of the a priori truth of praxeology the received view of which contributed to the academic marginalisation of the Austrian School The study puts forward a unique argument that Mises perhaps unintentionally defends a form of conventionalism Chapters in the book include detailed discussions of individualism historicism epistemological positions and essentialism The author goes on to discuss Mises justification of the fundamental axiom and proposes a conventionalist interpretation By presenting praxeology as a conventionalist research programme the author aims to reinvigorate the interaction between the Austrian School mainstream economics and the philosophy of science This comprehensive reconstruction is suitable for economists interested in the history and philosophy of their discipline as well as for philosophers of science

The Philosophical Origins of Austrian Economics David Gordon, 1994 The Austrian School of economics arose in opposition to the German Historical School and Carl Menger developed his methodological views in combat with the rival group Gordon discusses the philosophical doctrines of the Historical School and examines some of the philosophical influences on the founders of the Austrian School This monograph was prepared from a transcript of a talk Dr Gordon gave at the Mises University summer program at Stanford University 1994 The informal style of an oral presentation has been retained here The text has been edited expanded and lightly documented from Mises Institute website

Austrian Philosophy Barry Smith, 1994 When Franz Brentano introduced the concept of intentionality into modern philosophy he initiated a revolution in philosophical thinking whose effects are still being felt not least in contemporary developments in the field of cognitive science Barry Smith's *Austrian Philosophy The Legacy of Franz Brentano* is the first extensive study of the philosophy of the Brentano school The Brentanian philosophy is oriented towards the problem of mental directedness of how mind relates to objects Thus in working out their theories of objects the Brentanian philosophers in contrast to Frege and his successors in the analytic movement did not abandon psychological concerns in favor of an orientation towards language Rather their investigations in ontology proceeded always in tandem with work on the cognitive processes in which objects are experienced In thus spanning the gulf between psychology and ontology the Brentano school gave rise to movements of thought such as phenomenology and Gestalt psychology the term Gestalt was introduced as a technical term of philosophy by Brentano's student Ehrenfels The Brentanists enjoyed close relations with Carl Menger and other early members of the Austrian school of economics and *Austrian Philosophy* contains a detailed study of the interconnections between their work on the general theory of value and

subjective theories of value developed in the economic sphere Brentano's student Kasimir Twardowski initiated the rich tradition of scientifically and logically oriented philosophy in Poland and the role of Brentanianism in Polish philosophy and especially in the development of Lesniewski's mereology is here for the first time subjected to extended historical treatment Another Brentano student Carl Stumpf was responsible for introducing into philosophy the technical term *Sachverhalt* or state of affairs and the associated doctrine of realism in logic too is shown to have been a special preserve of the Brentano movement on the continent of Europe In setting out the ways in which Brentanian philosophers crucially influenced the development of scientific philosophy in Central Europe around the turn of the century Barry Smith's ambitious new work provides a detailed survey of developments in Austrian philosophy in its classical period from the 1870s to the Anschluss in 1938
