Rietveld The Complete Works:

Gerrit Th. Rietveld Marijke Küper, Centraal museum, 1992 **Gerrit Th. Rietveld** Marijke Küper, 1992 **Gerrit Th. Rietveld, 1888-1964** Gerrit Thomas Rietveld, Marijke Küper, Ida van Zijl, 1992 As architect and designer Gerrit Rietveld Utrecht 1888 1964 is one of the great international figures of this century His work was basically user friendly and he always tried to see architecture as something for people Reacting against the conventions with which he had grown up the driving force behind Rietveld's development became a quest for the essentials of architecture and design This led in 1918 to the now over familiar Red Blue Chair and six years after that to the internationally acclaimed Rietveld Schroeder House This house built in 1924 signified both an end and a beginning in Rietveld's career Whereas in the preceding years he had progressed from cabinet maker to architect and designer of a complete living environment he was now to concentrate largely on architecture More and more he voiced his support for a functional architecture in which he introduced new constructional methods and where the significance of form and colour was lessened After the Second World War he contributed to the Dutch reconstruction Neighbourhoods in Utrecht and Reeuwijk were built according to his design Within the straitjacket of regulations building stipulations and budgetary restrictions Rietveld contrived to introduce in a highly original but flexible manner the functional and aesthetic principles that he had defined before the war Always experimenting to find the right form always faithful to his principles his work was nevertheless of a huge diversity This variety is what makes Rietveld what he is Gerrit Th. Neue Sachlichkeit and Avant-Garde Ralf Grüttemeier, Klaus Beekman, Ben Rebel, 2013 One of the aims of the book is to shed more light on the notion Neue Sachlichkeit in its appearance in a variety of fields as painting architecture music photography and literature in order to get a clearer idea of its scope Several contributions will do so by analysing the heterogeneity in the use of the term concerning its function in the fight for recognition in the art fields around 1930 in other words Neue Sachlichkeit will be

analysed as a positioning strategy Especially its participation in the broader discourse on modernity as well as its international and intermedial dimension will be highlighted often using the historical avant garde as point of reference From this perspective the present volume wants to be read as a plea for a differentiated description of the many shared aspects and some differences between the avant garde and Neue Sachlichkeit **Encyclopedia of Twentieth Century**

Singerman, 2018-09-04 Texts including essays reviews and statements by the artist on the work of Sherrie Levine The artist Sherrie Levine b 1947 is best known for her appropriations of work by other artists most famously for her rephotographs of canonical images by Edward Weston Eliot Porter and other masters of modern photography Since those works of the early 1980s she has continued to work on and after artists whose names have come to define modernism making sculpture after Brancusi and Duchamp paintings after Malevich and Blinky Palermo watercolors after Matisse and Miro photographs after Monet and Cezanne as well as Alfred Stieglitz Throughout Levine's practice effectively uncompleted decentered and extended works of art that were once singular and finished posing critical rebuttals to some of the basic assumptions of modernist aesthetics Her work was central to the theorization of postmodernism in the visual arts most notably as it emerged in the pages of *October* magazine It challenged authorial sovereignty and aesthetic autonomy and invited readings that opened onto gender history and the economic and discursive processes of the art world This collection gathers writings on Levine from art magazines exhibition catalogs and academic journals spanning much of her career The volume begins with texts by Douglas Crimp Rosalind Krauss and Craig Owens that situate Levine in postmodernist discourse and link her early work to *October* The essays that follow draw on these first critical forays and complicate them at once deepening and resisting them as Levine's own work has done All the essays attempt to understand the relationship between Levine and the artists she cites and the objects that she recasts In these pages Levine's oddly doubled works appear as chimeras taxidermy fandom pratfalls even Poussin's *Blind Orion* Contributors Michel Assenmaker Douglas Crimp Erich Franz Catherine Ingraham David Joselit Susan Kandel Rosalind Krauss Sylvia Lavin Sherrie Levine Maria Loh Stephen Melville Craig Owens Howard Singerman *Chairs* Otakar Máčel, Sander Woertman, Charlotte van Wijk, 2008 The Faculty of Architecture of the TU Delft can pride itself on one of the foremost furniture collections in the Netherlands Set up as an educational tool the collection has offered knowledge about materials construction and typology to students and designers for more than a

Maintenance Architecture Hilary Sample, 2016-12-09 An inventive examination of a crucial but neglected aspect of architecture by an architect writing to architects Maintenance plays a crucial role in the production and endurance of architecture yet architects for the most part treat maintenance with indifference The discipline of architecture values the image of the new over the lived in the photogenic empty and stark building over a messy and labored one But the fact is homes need to be cleaned and buildings and cities need to be maintained and architecture no matter its form cannot escape from such realities In Maintenance Architecture Hilary Sample offers an inventive examination of the architectural significance of maintenance through a series of short texts and images about specific buildings materials and projects Although architects have seldom choose to represent maintenance imagining their work only from conception to realization artists have long explored subjects of endurance and permanence in iconic architecture Sample explores a range of art projects by artists including Gordon Matta Clark Jeff Wall and Mierle Laderman Ukeles to recast the problem of maintenance for architecture How might architectural design and discourse change as a building cycle expands to include post occupancy Sample looks particularly at the private home exhibition pavilion and high rise urban building giving special attention to buildings constructed with novel and developing materials technologies and precise detailing in relation to endurance These include Buckminster Fuller s Dymaxion House 1929 the Lever House 1952 the U S Steel Building 1971 and the O 14 2010 She considers the iconography of skyscrapers maintenance workforces both public and private labor saving technology and devices and contemporary architectural projects and preservation techniques that encompass the afterlife of buildings A selection of artworks make the usually invisible aspects of maintenance visible from Martha Rosler s Cleaning the Drapes to Inigo Manglano Ovalle s The Kiss
