Black Madonnas Lucia Chiavola Birnbaum, 2000 In the 1993 edition I considered black madonnas a metaphor for a memory of the time when the earth was belived to be the body of woman and all creatures were equal a memory transmitted in vernacular

traditions of earth bounded cultures historically expressed in cultural and political resistance and glimpsed today in movements aiming for transformation. Since then my understanding of black madonnas has been deepened by genetics finding that the origin of modern humans is Africa that migrations from Africa carried a primordial belief in a dark woman divinity to all continents. Black madonnas and other dark women of the world suggest a metaphor for healing millennial divisions of gender and race and concerted movements for justice.

Water Beings Veronica Strang, 2023-04-19 Looking to the vast human history of water worship a crucial study of our broken relationship with all things aquatic and how we might mend it Early human relationships with water were expressed through beliefs in serpentine aquatic deities rainbow colored feathered or horned serpents giant anacondas and dragons Representing the powers of water these beings were bringers of life and sustenance world creators ancestors guardian spirits and lawmakers Worshipped and appeased they embodied people's respect for water and its vital role in sustaining all living things Yet today though we still recognize that water is life fresh and saltwater ecosystems have been critically compromised by human activities This major study of water beings and what has happened to them in different cultural and historical contexts demonstrates how and why some but not all societies have moved from worshipping water to wreaking havoc upon it and asks what we can do to turn the tide

Steiner and Kindred Spirits Robert McDermott, 2015-08-01 Rudolf Steiner 1861 1925 the Austrian founder of Anthroposophy is frequently viewed by those familiar with his teaching as unique and separate from other spiritual teachers of our modern era While Steiner is thought by anthroposophists to be a scientist and a philosopher as well as an interpreter of events depicted in Christian scriptures he is nevertheless generally ignored by scientists and philosophers as well as by both liberal and fundamentalist scriptural scholars and theologians In this book Robert McDermott the editor of *American Philosophy* and Rudolf Steiner which investigates Steiner's philosophy in the context of American philosophers places Steiner and his work in the context of a variety of spiritual teachers and teachings both Western and Eastern In doing so the reader is guided to new perspectives that show the similarities and contrasts between Steiner's Spiritual Science and a number of Christian Hindu Buddhist and secular spiritual worldviews The kindred spirits in this book include His Holiness the Dalai Lama C G Jung Teilhard de Chardin Martin Buber Sri Aurobindo Rabindranath Tagore Gandhians feminists ecologists and more Steiner went as far up the spiritual ladder as any modern individual but unlike some enthusiasts for Steiner McDermott is also impressed by other religious thinkers and spiritual practitioners who have been helpful to those of us in need of encouragement and guidance and whose vistas and insights may not have been researched or explained by Steiner For those with unbiased open minds this book presents a fresh look at Rudolf Steiner a modern spiritual initiate and his contributions to the world along with a

generous and appreciative view of his kindred spirits of our time **Rebirth of the Goddess** Carol P. Christ,1998-10-15
 First published in 1999 One of the most unexpected developments of the late twentieth century is the rebirth of the religion of the Goddess in western cultures Though we were taught that the Gods and Goddesses died with the triumph of Christianity the re emergence of the Goddess is not as surprising as it might seem This book explores the meaning of the Goddess and the questions we ask as well as the ways we answer them *Antiquity and Social Reform* Dawn Hutchinson,2010-06-09 Although religious innovation in America has historically been the norm rather than the exception mainstream Americans have often viewed new religious movements with suspicion and occasionally with outright alarm The question motivating many studies of new religious movements has been why would someone join these religions In *Antiquity and Social Reform* Dawn Hutchinson offers at least one answer to this often repeated query She argues that followers of new religious movements in the 1960s 1980s specifically the Unification Church Feminist Wicca and the Nation of Yahweh considered these religions to be legitimate because they offered members a personal religious experience a connection to an ancient tradition and agency in improving their world Utilizing an historical approach *Antiquity and Social Reform* considers the conversion narratives of adherents and primary literature of the formative years of these movements which demonstrates that the religious experiences of the adherents and a resonance with the goals of these religions propelled members into social action **Moon Magick** D. J. Conway,1995 Demonstrates the power and rhythms of the moon to benefit physical emotional and spiritual well being Illus *Nature* Peter Coates,2013-04-26 *Nature* is a deceptively simple and ahistorical term suggesting intrinsic unchanging reality Yet nature has a history too both in terms of human attitudes and human impacts Coates outlines the major understandings of nature in the western world since classical times from nature as higher authority to its more recent meaning of threatened physical space and life forms Unlike many others this book places the history of attitudes to nature within the story of human induced changes in the material environment And few others take a supranational perspective or cross the divides between historical eras A distinctive unifying theme is Coates s interest in how green writers over the last thirty years have interpreted our past dealings with nature specifically their efforts to diagnose the roots of contemporary ecological problems and their search for ancestors He concludes with a discussion of the future of nature in the context of developments such as the new ecology global warming advances in genetic engineering and research on animal behaviour Assuming no previous knowledge *Nature* provides the reader with an accessible synthesis and introduction to some of environmental history s central features and debates confirming its status as one of the most enthralling current pursuits within historical studies This will be essential reading for second year undergraduates and above in cultural history and environmental history as well as to the general reader interested in environmental issues *Feminist Theory and the Classics* Nancy Sorkin Rabinowitz,Amy Richlin,2014-02-25 Provides the first broad introduction to feminist work in classical studies Including lesbian theory black feminist theory American and French feminist theory classics will

Krishnaraj, 2012-04-27 This book presents an overview of the varied experiences and representations of motherhood in India from ancient to modern times The thrust of the arguments made by the various contributors is that the centrality of motherhood as an ideology in a woman's life is manufactured This is demonstrated by analysing various institutional structures of society language religion media law and technology The articles in this book are chronologically arranged tracing the different stages that motherhood as a concept has traversed in India from goddess worship to nationalism to being a vehicle of reproduction of the sexual division of labour and the inheritance of property via the male line Underlying these stages are the dialectics between them that have been facilitated by agents such as the state the ultimate controller of

a woman's reproductive powers The feminist critique of essentialising the role of a woman has been employed to deconstruct and humanise the experiences and lives of mothers This anthology therefore attempts to initiate a meaningful and sensitive engagement with issues pertaining to a woman's autonomy over her body and her role also as a mother
