Love and Other Technologies Dominic Pettman, 2006 Can love really be considered another form of technology Dominic Pettman says it can although not before carefully redefining technology as a cultural challenge to what we mean by the human in the information age Using the writings of such important thinkers as Giorgio Agamben Jean Luc Nancy and Bernard Stiegler as a springboard Pettman explores the tectonic movements of contemporary culture specifically in relation to the language of eros Highly ritualized expressions of desire love in other words always reveal an era's attitude toward what it means to exist as a self among others For Pettman the articulation of love is a technique of belonging a way of responding to the basic

plurality of everyone's identity a process that becomes increasingly complex as the forms of mediated communication from cell phone and text messaging to the mass media multiply and mesh together Wrestling the idea of love from the arthritic hands of Romanticism Pettman demonstrates the ways in which this dynamic assemblage the stirrings of the soul have always been a matter of tools devices prosthetics and media Love is after all something we make And love this book argues is not eternal but external
