Shakespeare's Ecology of Natural Resources Sophie Chiari, 2025-11-13 Sophie Chiari analyses how Shakespeare's plays and poems present the transformation of the early modern natural world through environmental shifts and ecological transformation. Using a range of examples from the Sonnets, Love's Labour's Lost, The Tempest, Hamlet, and Henry V, Chiari's ecopoetic study of dramatic language explores Shakespeare's response to the rise of extractive exploitation in Elizabethan and Jacobean England. Chiari expands our understanding of the environment in Shakespeare beyond the so-called green comedies by charting the transition from a pre-capitalist world towards a commodity-based society ruined by the enclosure of the commons. Using examples of water systems, sandscapes, soil, and frost alongside the production of glass and salt in Shakespeare, these materials which are currently underrepresented in Shakespearean ecocriticism signal a commitment to expanding the material turn in Shakespeare studies. Far from being limited to the present era, this book argues that cultural hegemony and the exploitation of soil, water, and ice were increasingly linked in the early modern era, an age of conquest and massive human depredation. By interweaving ecohistoricist, ecopoetics, and material studies, Shakespeare's Ecology of Natural Resources shows how an eco-minded approach focused on the interweaving of trade, territory, and extractivism reveals new layers of meaning in Shakespearean poetics and drama.

World Christianity and Ecological Theologies Raimundo C. Barreto, Graham McGeoch, Wanderley Pereira da Rosa, 2024-10-22 World Christianity and Ecological Theologies invites scholars in religious studies and theology from different continents and contexts to a North-South dialogue on environmental ethics, political ecology, and ecofeminism. Throughout the global pandemic, the connection between environmental rapacity, religion, and political interests has once again called scholarly attention to the important conversation on public religion and global environment-related issues. Acknowledging a deficit among scholars of World Christianity in addressing environmental concerns and the field's limited language for framing those concerns, this book aims to bring the fields of study of World Christianity, religion, and ecology into a sustained conversation with the goal of expanding the theoretical horizons of these fields. World Christianity and Ecological Theologies reiterates that all Christian theologies are contextual as they shape and are shaped by specific historical and cultural circumstances. It aims at showcasing the ways in which the intersection of religion and ecology is approached by scholars in religious studies and theology in the Global South or by those in conversation with them in the Global North, pointing to what can be generated if these bodies of scholarship are engaged as dialogue partners to investigate new patterns of religious environmentalism.

American Popular Culture since Independence William H. Beezley, Linda A. Curcio-Nagy, 2011-11-16 This unique reader offers an engaging collection of essays that highlight the diversity of Latin America's cultural expressions from independence to the present. Leading historians explore funerals, dance and music, letters and literature, spectacles and monuments, and world's fairs and food. These themes and events highlight the ways in which a wide range of individuals with copious at times contradictory motives attempted to forge identity, turn the world upside down, mock their betters, forget their troubles through dance, express love in letters, and altogether enjoy life. The authors analyze case studies from Argentina, Brazil, the Dominican Republic, Ecuador, Mexico, Nicaragua, Peru, and Trinidad Tobago, tracing how their examples resonate in the rest of the region. They show how people could and did find opportunities to escape if only occasionally their daily drudgery, making lives for themselves of greater variety than the constant quest for dominance, drive for profits, or knee-jerk resistance to the social or economic order so often described in cultural studies. Instead, this rich text introduces the complexity of motives behind and the diversity of expressions of popular culture in Latin America.

Committee on Public Works, 1970. *Laudato Si* Anthony Kelly, 2016-09-20 Pope Francis. *Laudato Si* is a game-changing document for the life of the Church and the ecological health of this planet. A Catholic vision is deficient if it does not include the earth and its life forms. Loving one's neighbour must include loving the planetary neighbourhood in which all live. For its part, the integral ecology on which the Pope insists must include the dimensions of mind and heart, science and art, faith and the whole spiritual life of culture. Here the great theological themes animating the Catholic vision play their part as ever-renewable resources: the Creator and the gift of creation, the incarnation of the Word amongst us, the inexhaustible life of the Trinity itself, the Eucharist as communion with Christ in the here and now of earthly life, just as Sister Death must be given her place for the sake of ecological and eschatological realism. Integral ecology and Catholic vision are two sides of the conversion of mind and heart necessary to promote the communion of life now and in the world to come.

Beyond Interdependence : The Meshing of the World's Economy and the Earth's Ecology Ottawa Jim MacNeill Senior Fellow Institute for Research on Public Policy, Physical Planning, Pieter Winsemius Senior Fellow former Dutch Minister of Housing, and Environment, Taizo Yakushiji Professor of Technology and International Relations Saitama University, 1991-08-01 Over the last year the world has seen some cataclysmic changes. Eastern Europe is no longer yoked with Soviet communism. Germany is again a single powerful nation and Russia itself is pursuing a free market economy at an almost frantic pace. Yet as we focus on the triumph of democracy it is easy to overlook the potentially catastrophic changes that face the world environment, changes that are inextricably linked to the workings of the political and economic institutions of our time. *Beyond Interdependence* builds upon the Brundtland

Commission's landmark report *Our Common Future* a book that has been hailed as the most important document of the decade on the future of the world and has sold over one half million copies in nineteen foreign languages. Dr. Jim MacNeill, the principal author of both works, has in this latest study extended the Commission's analysis of the critical relationships between the global environment, the world economy, and the international order. Together with his eminent colleagues Pieter Winsemius and Taizo Yakushiji, MacNeill shows that while our global economy and ecology have become completely interlocked, they have remained separate in our institutions and in the minds of our policymakers. The result is a wide range of domestic and international policies that are accelerating the depletion of Earth's basic ecological and economic capital: its rivers, lakes, and oceans; its soils and forests; its flora and fauna; and its ozone shield. These short-sighted policies also threaten us in the next century with a greater rise in global warming and sea level than have occurred in the ten thousand years since the last ice age. The authors argue that this environmental degradation and resource depletion will be the principal source of interstate conflict in the post-cold war world. Providing a fresh analysis of the issues of global change and taking into account such recent events as the tidal shift in East-West relations and the G7 Economic Summit in Houston, *Beyond Interdependence* shows how industrialized nations can take unilateral action to address environmental threats while improving macroeconomic efficiency and international competitiveness. It also demonstrates how developed nations can negotiate a series of mutually advantageous bargains with Eastern European and Third World nations. With its incisive analysis and far-reaching recommendations for policy reform, *Beyond Interdependence* shows us how we can act urgently but intelligently to advance our common future. — *Elgar Encyclopedia of Environmental Sociology* Christine Overdevest, 2024-04-12

The *Elgar Encyclopedia of Environmental Sociology* serves as a repository of insight on the complex interactions, challenges, and potential solutions that characterize our shared ecological reality. Presenting innovative thinking on a comprehensive range of topics, expert scholars, researchers, and practitioners illuminate the nuances, complexities, and diverse perspectives that define the continually evolving field of environmental sociology. — *Sustainability Perspectives for Resources and Business* Orie L. Miami University in Oxford, Ohio, offers a course entitled *Sustainability Perspectives* based on this text. The course was awarded The Instructional Innovation Award at the 1996 annual meeting of the Decision Sciences Institute, an association of decision science professionals headquartered at Georgia State University in Atlanta. The 1990s have seen the development of important new approaches to sustaining corporate development and protecting the environment. Corporations are beginning to realize their responsibilities for a healthy environment. Sustainable development is viewed as an integrated ecological, economic, and social system in which both economic growth and quality of life improvements can occur in a unified system complementary to the maintenance of natural capital. *Sustainability Perspectives for Resources and Businesses* shows the reader that a sound understanding of the concepts involved in sustainable development is beneficial to businesses, natural

resources and the population in general This textbook was written to help students and professionals involved in business science or engineering to understand the changes occurring in the workplace It serves as a step toward understanding how business and science as professional communities are adapting to new information about risks to the environment Various chapters are devoted to resources values and valuation systems Each section develops principles such as resilience and integrity in the economy and the environment Bihar Higher Secondary School Teacher Geography Book (Part I)
