Dark and Magical Places Christopher Kemp, 2022-01-25 Kemp is a natural storyteller a deft explainer and a terrific and funny writer Mary Roach author of Fuzz How the brain helps us to understand and navigate space and why sometimes it doesn't work the way it should Inside our heads we carry around an infinite and endlessly unfolding map of the world Navigation is one of the most ancient neural abilities we have older than language In Dark and Magical Places Christopher Kemp embarks on a journey to discover the remarkable extent of what our minds can do Fueled by his own spatial

shortcomings Kemp describes the brain regions that orient us in space and the specialized neurons that do it Place cells Grid cells He examines how the brain plans routes recognizes landmarks and makes sure we leave a room through a door instead of trying to leave through a painting From the secrets of supernavigators like the indigenous hunters of the Bolivian rainforest to the confusing environments inhabited by people with place blindness Kemp charts the myriad ways in which we find our way and explains the cutting edge neuroscience behind them How did Neanderthals navigate Why do even seasoned hikers stray from the trail What spatial skills do we inherit from our parents How can smartphones and our reliance on GPS devices impact our brains In engaging engrossing language Kemp unravels the mysteries of navigating and links the brain s complex functions to the effects that diseases like Alzheimer s types of amnesia and traumatic brain injuries have on our perception of the world around us A book for anyone who has ever felt compelled to venture off the beaten path Dark and Magical Places is a stirring reminder of the beauty in losing yourself to your surroundings And the beauty in understanding how our brains can guide us home

The Brain: A User's Manual Marco Magrini,2019-03-21 Congratulations on the purchase of this exclusive product tailor made just for you It will provide you with years of continuous existence So begins The Brain A User s Manual Marco Magrini s fascinating guide to the inner workings of one of nature s most miraculous but misunderstood creations the human brain This user friendly manual offers an accessible guide to the machine you use the most deconstructing the brain into its constituent parts and showing you both how they function and how to maintain them for a longer life Cutting through the noise of modern pop psychology The Brain A User s Manual is a refreshingly factual approach to self help Written with a deft style and wry humour it offers tips on everything from maximising productivity to retaining memory and boosting your mood

With One Hand Tied behind My Brain Avrel Seale,2020-11-17 Most would not expect a book about a stroke to be entertaining but this memoir will force you to laugh through a tragedy then cry then laugh again Avrel Seale was fifty did not smoke or drink had low blood pressure and had hiked more than two hundred miles the year a stroke nearly ended his life In an instant he was teleported into the body of an old man unbalanced shaky spastic and half paralyzed Overnight he was plunged into a world of brain surgeons nurses insurance case managers and an abundance of therapists Beginning three weeks before his stroke to set the stage Seale leads us through the harrowing day of his stroke and emergency brain surgery with minute by minute intensity We then follow him through ICU a rehab hospital and a neuro recovery group living center where we meet a memorable cast of other stroke survivors and also those recovering from auto accidents and gunshots Finally home Seale leads us through a new life of firsts including returning to work to driving to playing guitar to camping and even to writing a book all with one hand What emerges from his humor elegant but devastating is a revealing critique of the hospital experience the insurance industry and rehab culture And his nothing off the table quest for recovery shows both the sobering struggles and inspiring possibilities of life after a stroke in twenty first century America

When Hitler Took Cocaine and Lenin Lost His Brain Giles Milton,2024-09-04 An

addictive compendium of 50 little known historic tales that are seemingly too good to be true with plenty of fabulously dramatic adventures Publishers Weekly When Hitler Took Cocaine and Lenin Lost His Brain is the first installment in Giles Milton's outrageously entertaining series History's Unknown Chapters colorful and accessible intelligent and illuminating stories from the past that you probably never knew about Covering everything from adventure and espionage to war and murder this volume reveals the stories of the female Robinson Crusoe Hitler's final hours Japan's deadly balloon bomb and the emperor of the United States There's also the cook aboard the Titanic who survived the icy seas by pickling himself with whiskey And the man who survived the atomic bomb in both Hiroshima and Nagasaki Along with many many more

Horror on the Brain Austin Lim, 2025-04-08 A fascinating exploration of the science and psychology behind fear madness and the haunting stories that linger in our minds Scientists throughout centuries have mined the depths of humanity looking for and finding answers to life's most mysterious questions but perhaps the most memorable accounts of hidden dimensions have been left to us by science fiction writers like Philip K Dick and Octavia Butler When science discovers science fiction writers ask what's next Horror on the Brain reveals the real science and psychology behind science fiction's most iconic characters from Mary Shelley's Dr Frankenstein to the doctors of H P Lovecraft and even today's horror blockbusters like Get Out and The Last of Us In this fascinating exploration of fear and madness neuroscientist Dr Austin Lim recounts psychology's most bizarre and haunting real life cases alongside famous speculative fiction that stretched that science to the edge In 1924 Hans Berger invented the EEG a commonly used brain imaging device as a means to telepathically communicate with his sister eerily similar to the protagonist in H P Lovecraft's Beyond the Wall of Sleep while Nobel Prize winning research on marine animals in the 1960s reflects his tentacled creations Phineas Gage the 19th century man who experienced a dramatic personality shift following a traumatic brain injury shares similarities to Robert Louis Stevenson's Dr Jekyll Investigate the neurological causes of schizophrenia and how characters in Sheridan Le Fanu's story In a Glass Darkly manifest the diagnosis Neurological conditions from sleepwalking to the Cotard delusion which leads patients to believe they are dead even going to such extremes as burying themselves alive have provided the basis for horror stories since their discovery and likewise the wildly imaginative minds of writers have even prompted scientific research Horror on the Brain uses illuminating analogies to connect science fact and science fiction showing how spooky stories contain insights into the dark corners of the human mind and why we can't stop looking into the abyss *Psyche's Palace: How the Brain Generates the Light of the Soul* David Aaron Holmes, 2007-09-08 This pioneering theoretical model of consciousness deftly bridges the chasm between science and spirituality with a bridge of literal and figurative Light Conventional wisdom in neurobiology holds that the brain is nothing more than a complex biocomputer whose neurons sole purpose is to process and transmit information Psyche's Palace proposes a new theory that the brain creates this brilliant sound and light show directly upon the convoluted surfaces of the cerebral cortex A filigree of sparkling pixels suspended in the crystal clear fluid of the cerebral

cortex forms the live and luminous theater in which the external world is continuously recreated Everything you see and hear and feel must be sculpted directly from the bioluminescence of vast oscillating networks of neurons The brain is simply the material substrate that holds the exuberance in place What if it actually is true what the wise have always said that YOU ARE the pure Light of consciousness that shines within *Scientific American* ,1906 The Big 100 William J. Kole,2023-10-03 Journalist William J Kole reluctant but newly minted member of AARP explores the looming era of super aging incredibly longer lifespans overall and eight times more centenarians by the year 2050 through the lens of past present and future life at ages 50 65 80 and on to 100 plus What happens to all of us when 65 is merely a life half lived By 2050 the world's centenarian population those aged 100 or more will increase eightfold Half of today's 5 year olds can expect to reach the same heights It's going to upend everything we thought we knew about health care personal finance retirement politics and more Whether we're 18 or 81 this tectonic demographic shift will affect us all The Big 100 confronts readers with both the brightness and potential bleakness of a fate few of us thought possible Journalist William Kole guides us on this journey into our future an optimistic but sometimes fraught exploration of super aging as the grandson of a centenarian Along the way there are expert sources like Dr Jane Goodall longevity expert Dr Thomas Perls Senator Elizabeth Warren and even 101 year old influencer and fashionista Iris Apfel along with surprises including the truth about those so called Blue Zones everyone thinks are centenarian factories Spoiler alert They're not And there's the troubling truth that those reaching extreme longevity tend to be overwhelmingly white a product of what experts deem the weathering theory the idea that the health of African Americans begins to deteriorate in early adulthood as a physical consequence of socio economic disadvantages How long can we live How long should we live And what happens when 65 is merely a life half lived The Big 100 explores the most pressing questions of our super aging future and offers a glimpse of a reality that awaits us our children and our grandchildren
