New History Of The English Public Library:

A New History of the English Public Library Alistair Black, 1996 A history of the public library in England providing an account of the social and intellectual contexts in which the institution developed in the years 1850 1914 including social control technical education economic decline middle class failure and the social causes of architectural style Books, Buildings and Social Engineering Alistair Black, Simon Pepper, Kaye Bagshaw, 2009 This important and comprehensive book represents a ground breaking socio architectural study of pre 1939 public library buildings It includes a study of what is happening to historic libraries now and proposes that knowledge of their origins and early development can help build an understanding of how best to handle their future *International Dictionary of Library Histories* David H. Stam, 2001-11 Following the format of Fitzroy Dearborn's highly successful *International Dictionary of Historic Places* and *International Dictionary of University Histories* the *International Dictionary of Library Histories* provides basic information for each institution location and holdings followed by an extensive 1 000 5 000 word essay on its history as well as a Further Reading list In addition the dictionary includes introductory articles on the history of various types of libraries and a library history in various regions of the world The dictionary profiles more than 200 institutions from around the world including the world's most important research libraries and other libraries with globally or regionally notable collections innovative traditions and significant and interesting histories The essays take advantage of the growing scholarship of library history to provide insightful overviews of each institution including not only the traditional values of these libraries but their innovations as well such as developments in automated systems and electronic delivery The profiles will emphasize the unique materials of research in these institutions archives manuscripts personal and institutional papers The introductory articles on types of libraries include topics ranging from theological libraries to prison libraries from the ancient to the digital An international team of more than 200 leading scholars in the field have contributed essays to the project A Social History of Books and Libraries from Cuneiform to Bytes Patrick M. Valentine, 2012-09-27 While the importance of writing has often been recognized the role of books and especially that of libraries has just as often been slighted Knowledge once generated has to be communicated preserved and accessible Books in their varying formats from clay tablets to scrolls and manuscripts to pixels have been instrumental in spreading knowledge although relatively little attention has been given to the story of books themselves *A Social History of Books and Libraries from Cuneiform to Bytes* traces the roles of books and libraries throughout recorded history and explores their social and cultural importance within differing societies and changing times It presents the history of books from clay tablets to e books and the history of libraries whether built of bricks or bytes Following an introduction that sets the theoretical basis for the historical importance of books and libraries chapters alternate between the history of the book and the history of libraries Included within the chapters are short excursions on some particular development such as book emblems or cataloging Case studies are given as thematic illustrations of libraries

everywhere Patrick M Valentine argues that social and cultural forces have been more influential in determining the nature and status of information books and libraries than has technology But *A Social History of Books and Libraries* is far from a jeremiad against technology rather it presents history within the subtle yet shifting context of time and place Although written primarily for librarians and library students it will also be of interest to a wider audience of scholars and those interested in books libraries and cultural history

The Museum Movement Ian McShane, 2025-03-04 The Museum Movement provides the first systematic overview of the museum movement of the early twentieth century which encouraged museums to play a greater role in education and civic uplift Highlighting the key role played by the Carnegie Corporation in guiding museum development in the late colonial period this book shows that the movement was strongly influenced by the racial politics of the period and that its focus on local histories and civic engagement sought to boost the historical legitimacy and continued vitality of small towns and their dominant white populations Demonstrating that the museum movement placed new emphasis on the importance of professionalisation interpretation and audience engagement McShane shows how by the late 1930s the movement had helped lay the foundations of museology This book also constructs a genealogy of the new museology the next wave of museum reform that emerged in the 1970s by reflecting critically on the newness of some of its ideas Indicating that new thinking about audience display media and the economics of culture has a longer history this book also provides historical perspectives on current interests in informal and social learning the formation of museum publics and institutional convergence The Museum Movement explores the intersections and crosscurrents of modernism and settler colonialism and will thus appeal to academics and students with an interest in museum studies heritage history colonial studies and race

The Early Information Society Alistair Black, Dave Muddiman, 2016-03-23 Whether termed the network society the knowledge society or the information society it is widely accepted that a new age has dawned unveiled by powerful computer and communication technologies Yet for millennia humans have been recording knowledge and culture engaging in the dissemination and preservation of information In *The Early Information Society* the authors argue for an earlier incarnation of the information age focusing upon the period 1900 1960 In support of this they examine the history and traditions in Britain of two separate but related information rich occupations information management and information science repositioning their origins before the age of the computer and identifying the forces driving their early development *The Early Information Society* offers an historical account which questions the novelty of the current information society It will be essential reading for students researchers and practitioners in the library and information science field and for sociologists and historians interested in the information society
