Whyte,2004-03-03 Landscape and History explores a complex relationship over the past five centuries The book is international and interdisciplinary in scope drawing on material from social economic and cultural history as well as from geography archaeology cultural geography planning and landscape history In recent years as the author points out there has been increasing interest in and concern for many aspects of landscape within British European and wider contexts This has included the study of the history development and changes in our perception of landscape as well as research into the links between past landscapes and political ideologies economic and social structures cartography art and literature There is also considerable concern at present with the need to evaluate and classify historic landscapes and to develop policies for their conservation and management in relation to their scenic heritage and recreational value This is manifest not only in the designation of particularly valued areas with enhanced protection from planning developments such as national parks and world heritage sites but in the countryside more generally Further Ian D Whyte argues changes in European Union policies relating to agriculture with a greater concern for the protection and sustainable management of rural landscapes are likely to be of major importance in relation to the themes of continuity and change in the landscapes of Britain and Europe *Out of Place* Michael Hough,1990-01-01 Hough argues that the monotony of the modern landscape is a reflection of society s indifference to the diversity inherent in ecological systems and in human communities He uses world wide case studies to show how built areas work and how designers can maintain the identities of different places **Landscape and**

Threatened Landscapes Bryn Green, 2003-09-02 Few if any environments are free of human intervention Often this generates ecosystems which are rich in biodiversity historical interest recreational opportunity and scenic beauty just as worthy of conservation as the more natural ecosystems on which protection programmes have been almost exclusively focussed These cultural landscapes ranging from the farm and forest lands of Europe and Eastern North America through to the pasture lands and savannas of the Middle East and Africa to the paddylands of the Pacific Rim are usually the product of relatively low level sustainable exploitation of the environment over long periods of time Many have survived for centuries if not millennia but now urban expansion depopulation of rural areas and most damagingly the intensification of agricultural and silvicultural practices are everywhere leading to a loss of their cherished biodiversity and amenity Whilst past changes have mostly added to the valued characteristics of these landscapes modern farming and forestry are creating sterile monocultures on the better land whilst marginal lands are being abandoned This book documents these changes illustrates them through detailed case studies of a representative selection of threatened landscapes analyses their underlying causes and explores ways by which they can continue to be maintained or new landscapes created which maintain their desired characteristics

Arcadian Visions Allan R. Ruff, 2015-10-31 This book is about Arcadia and the pastoral tradition what it has meant for successive generations and their vision of the landscape as well as the implications this has had for its design and management Today the concept of Arcadia and way it has shaped our landscape is dimly perceived and little understood by landscape architects and those responsible for the management of land This is in marked contrast to previous centuries when the vision of Arcadia and the pastoral was implanted by education among the more privileged in society Young men spent many hours translating and learning by rote the words of Virgil and other classical authors and on the Grand Tour they would be introduced to work of painters like Poussin and Claude and their interpretations of the Ideal pastoral landscape Today Arcadia holds as powerful an influence as at any time in the past and it is important that we plan our urban environment in ways that harmonize with the natural world Arcadian Visions provides an alternative landscape history for all those involved with the landscape either through its design management use or enjoyment It begins by examining the origins of Arcadia and the pastoral in the classical poetry of Theocritus and Virgil and the effects of and on Christianity before outlining its development in renaissance Italy and subsequently in the Netherlands America and England It concludes by looking at how Arcadian ecology is bringing about a reappraisal of the pastoral in the 21st century
