*The Good Temp* Vicki Smith, Esther B. Neuwirth, 2010-08-20 Temporary agencies place approximately two and a half million people in jobs each day in the United States Every year about twelve million people use these placement agencies to find temporary work Many Americans even those who desire permanent jobs decide to enter the labor market through the portal of temporary agencies Compared with the post World War II era when it was a marginal labor practice temporary employment is today an entrenched feature of jobs and labor markets How have temporary employment relationships become so widespread and normalized In The Good Temp Vicki Smith and Esther B Neuwirth provide some novel answers to this question Their provocative analysis is based on an insider's view of the interior dynamics of a temporary help agency in Silicon Valley It incorporates a historical perspective on the rise of the temporary help service industry Smith and Neuwirth document how this powerful industry not only created a new market for temporary labor but also played a fundamental role in the erosion of the permanent employment model They analyze how agencies themselves came to manufacture and market this reinvented product the good temp an employee who is effective and efficient committed and sometimes preferable to a permanent staff member Joining extensive participant observation data with historical analysis The Good Temp contains some surprising findings about temporary employment today and fills a significant gap in our understanding of this important labor relationship

*The Burdens of Aspiration* Elsa Davidson, 2011-08-22 During the tech boom Silicon Valley became one of the most concentrated zones of wealth polarization and social inequality in the United States a place with a fast disappearing middle class persistent pockets of poverty and striking gaps in educational and occupational achievement along class and racial lines Low wage workers and their families experienced a profound sense of exclusion from the techno entrepreneurial culture while middle class residents witnessing up close the seemingly overnight success of a new entrepreneurial class negotiated both new and seemingly unattainable standards of personal success and the erosion of their own economic security The Burdens of Aspiration explores the imprint

of the region's success driven public culture the realities of increasing social and economic insecurity and models of success emphasized in contemporary public schools for the region's working and middle class youth Focused on two disparate groups of students low income at risk Latino youth attending a specialized program exposing youth to high tech industry within an under performing public high school and middle income white and Asian students attending a high performing public school with informal connections to the tech elite Elsa Davidson offers an in depth look at the process of forming aspirations across lines of race and class By analyzing the successes and sometimes unanticipated effects of the schools attempts to shape the aspirations and values of their students she provides keen insights into the role schooling plays in social reproduction and how dynamics of race and class inform ideas about responsible citizenship that are instilled in America's youth **eBoys** Randall E. Stross, 2001-03-01 In *eBOYS* Randall Stross takes us behind the scenes and inside the heads of the gutsy entrepreneurs who are financing the hottest businesses on the Web The six tall men who started Benchmark Silicon Valley's most exciting venture capital firm put themselves at the cutting edge of the new economy by backing billion dollar start ups like eBay and Webvan The risks were enormous but the rewards have proven to be staggering Within two years eBay's net worth grew from 20 million to more than 21 billion while each Benchmark founding partner saw his own personal net worth soar by hundreds of millions of dollars For two roller coaster years Stross had total access not only to Benchmark's executives but to the companies they financed He was a fly on the wall as fortunes were made in an instant snap decisions got locked in and new ventures took off and sometimes crashed Here are the testosterone pumped conversations round the clock meetings and gutsy deals that launched the eBoys and their clients into the stratosphere of mega wealth Written like a novel but absolutely true *eBOYS* brings to vivid life the glory days of the greatest business adventure of our time

Ambition Ellie Rubin, 2008-04-18 In this practical provocative and proven book Rubin shows how to turn raw ambition into managed success through the seven rules of ambition She emphasizes that everyone must define ambition on his or her own terms *U-Turn* Bruce Grierson, 2008-12-01 In this impressively researched and incisive book Bruce Grierson draws on over three hundred stories of so called U turners who have risked their livelihoods to answer a sudden wake up call We meet people who change political parties and careers doctors who quit to become poets men who become women people who suddenly become revolutionaries for a cause they didn't care about the day before In chapters that address everything from the neuroscience behind epiphanies to the possibility of forcing a U turn Grierson brilliantly describes and elucidates this powerful mysterious phenomenon and in doing so illuminates all of our continual struggles with life choices and identity

Managing.com Fredrik Arnander, 2001 Annotation European financial consultant and entrepreneur Arnander advises managers of new and old companies to pay attention to leadership action people the workplace culture interaction business customers communication and failures This is his first book to be translated into English Annotation c Book News Inc Portland OR booknews.com **The Scientific Life** Steven Shapin, 2009-08-01 Who are scientists What kind of people are

they What capacities and virtues are thought to stand behind their considerable authority They are experts indeed highly respected experts authorized to describe and interpret the natural world and widely trusted to help transform knowledge into power and profit But are they morally different from other people The Scientific Life is historian Steven Shapin s story about who scientists are who we think they are and why our sensibilities about such things matter Conventional wisdom has long held that scientists are neither better nor worse than anyone else that personal virtue does not necessarily accompany technical expertise and that scientific practice is profoundly impersonal Shapin however here shows how the uncertainties attending scientific research make the virtues of individual researchers intrinsic to scientific work From the early twentieth century origins of corporate research laboratories to the high flying scientific entrepreneurship of the present Shapin argues that the radical uncertainties of much contemporary science have made personal virtues more central to its practice than ever before and he also reveals how radically novel aspects of late modern science have unexpectedly deep historical roots His elegantly conceived history of the scientific career and character ultimately encourages us to reconsider the very nature of the technical and moral worlds in which we now live Building on the insights of Shapin s last three influential books featuring an utterly fascinating cast of characters and brimming with bold and original claims The Scientific Life is essential reading for anyone wanting to reflect on late modern American culture and how it has been shaped
