their hopes dreams plans and politics engagement with social media food preferences and nutrition engagement with language family and changing mores affecting sexual behaviour and marriage The book aims to provide readers with a greater understanding of the day to day lives of Aboriginal adolescents and some of the adults who care for or neglect them It seeks to provide readers with a better understanding of the circumstances processes and factors that affect adolescent health wellbeing and future prospects in their intercultural environments and glimpse the multiplicity of these circumstances processes and factors and the complexity of their interaction

pragmatics of fieldwork Practical aspects of community involvement in language documentation are discussed such as the setting up of local archives and the training of local linguists Numerous case studies illustrate different language shift environments with specific replacing factors such as colonial and religious conquests migrations and governmental language education The book is of interest to students and scholars of linguistics with particular focus on endangered languages and their documentation typology and sociolinguistics as well as to anthropologists and language activists *Crocodile Undone* Marcus Baynes-Rock,2020-03-19 Across the world animals are being domesticated at an unprecedented rate and scale But what exactly is domestication and what does it tell us about ourselves In this book Marcus Baynes Rock seeks the common thread linking stories about the domestication of Australia's native animals arguing that domestication is part of a process by which late modernity threatens to undo the world In a deeply personal account the author tells of his encounters with crocodiles and emus behind fences dingoes and kangaroos crossing boundaries and native bees producing honey in his suburban backyard Drawing on comparisons between Aboriginal and colonial Australians Baynes Rock reveals how the domestication of Australia's fauna is a process of unmaking As an extension of late modernity the connections that tie humans and other animals to wider ecologies are being severed threatening to isolate us and our domesticates from the rest of the world It is here that Baynes Rock reveals a key difference between Aboriginal and colonial Australian modes of landscape management while one is focused on a systemic approach and sees humans as integral to ecological integrity the other seeks to sever domesticates from ecological processes The question that emerges is How might we reconfigure and maintain these connections without undoing humanity Written in the author's characteristically frank passionate and humorous style *Crocodile Undone* takes the reader on a journey across both physical and philosophical landscapes This fascinating narrative will appeal to anyone interested in the vital connections between humans and animals *The Languages and Linguistics of Australia* Harold Koch,Rachel Nordlinger,2014-08-19 The Languages and Linguistics of Australia A Comprehensive Guide is part of the multi volume reference work on the languages and linguistics of the continents of the world The volume provides a thorough overview of Australian languages including their linguistic structures their genetic relationships and issues of language maintenance and revitalisation Australian English Aboriginal English and other contact varieties are also discussed *Fillers, Pauses and Placeholders* Nino Amiridze,Boyd H. Davis,Margaret MacLagan,2010-09-29 Fillers are items that speakers insert in spontaneous speech as a repair strategy Types of fillers include hesitation markers and placeholders Both are used to fill pauses that arise during planning problems or in lexical retrieval failure However while hesitation markers may not bear any resemblance to lexical items they replace placeholders typically share some morphosyntactic properties with the target form Additionally fillers can function as a pragmatic tool in order to replace lexical items that the speaker wants to avoid mentioning for some reason The present volume is the first collection on the topic of fillers and will be a useful reference work for future investigations on the topic It consists of typological surveys

and in depth studies exploring the form and use of fillers across languages and sections of different populations including cognitively impaired speakers The volume will be interesting to typologists and linguists working in discourse studies

categories types and levels of linguistic description The scope of the individual contributions to the volume varies from worldwide typological samples to family internal typology to in depth studies of single languages The range of linguistic domains addressed include tonology morphology syntax and lexical classes Among the phenomena scrutinized are clitics tones case agreement indexation localization pluractionality desideratives lability comitative constructions raising verb formation nominal classification parts of speech and predicates of change More general theoretical and methodological issues addressed include such topics as markedness grammaticalization lexicalization and the integration of linguistic data and description The book is of interest to typologists and field linguists as well as to any linguists interested in theoretical issues in different subfields of linguistics A particular contribution of the volume is to present a synthesis of typological and descriptive approaches to the study of language and to highlight the fact that broader typological study and the focused investigation of particular languages are interdependent ventures that necessarily inform each other      **Functional**
