DNP student and professional Advanced Practice in Healthcare Carol Cox, Marie Hill, Victoria Lack, 2013-06-17 Advanced Practice in Healthcare outlines the key components of advanced practice in which healthcare professionals are engaged. With a clear skills focus, it explores issues critical to providing effective enhanced care to patients whilst managing and negotiating the complexities of the healthcare delivery system. Perspectives on advanced practice are illuminated throughout the text and are designed to promote the formation of new thinking in relation to practice education and research. The text is comprised of three sections that address different aspects of advanced practice and these in turn provide guidance on the development of clinical skills including consultation, clinical decision making, holistic care and the role of care planning in advanced practice. Explain management skills and how to manage, negotiate and monitor the complexities of the healthcare system in order to ensure the delivery of quality patient care. Clarify the professional role of the advanced practice clinician and how implementation of the role can improve the delivery of patient care. In each chapter, activities are presented that assist in the development, implementation and extension of advanced level practice. This text is especially relevant to nurses, midwives and allied health professionals practising within primary and secondary care who wish to advance their practice or clarify their roles within the context of advanced practice, particularly those undertaking masters level study. **Competencies for Advanced Nursing Practice** Sue Hinchliff, Rosemary Rogers, 2008-08-29 Competencies for Advanced Nursing Practice is the first and definitive book to deliver guidance for practitioners working to be recognized for their advanced nursing practice. Written by experienced academics and advanced nurse practitioners from a variety of clinical backgrounds, this handbook will support nurses on their journey towards advanced nursing practice and provide detailed information on achieving the competencies within each of the seven domains outlined in the RCN and the NMC's proposed Standards of Proficiency for Advanced Nurse Practitioners: the nurse-patient relationship, respecting culture and diversity, management of patient health, illness status, the education function, professional role, managing and negotiating health care delivery systems and monitoring and ensuring the quality of health care practice. The text concludes with a section on how practice can be recorded and used in the portfolioing and accreditation process, how to collect and record evidence and how nurses can be supported and facilitated through this process. Aimed at the professional nurse working towards an advanced level of practice, the nurse already practising at this level and seeking accreditation, and also the student and newly qualified nurse giving early consideration to their future career, this book offers clear and user-friendly guidance for anybody wishing to undertake this standard of nursing practice. **Nurse Practitioners and Nurse Anesthetists: The Evolution of the Global Roles** Sophia L.
