Meleis,2010-02-17 It is very exciting to see all of these studies compiled in one book It can be read sequentially or just for certain transitions It also can be used as a template for compilation of other concepts central to nursing and can serve as a resource for further studies in transitions It is an excellent addition to the nursing literature Score 95 4 Stars Doody s Understanding and recognizing transitions are at the heart of health care reform and this current edition with its numerous clinical examples and descriptions of nursing interventions provides important lessons that can and should be incorporated into health policy It is a brilliant book and an important contribution to nursing theory Kathleen Dracup RN DNSc Dean and Professor School of Nursing University of California San Francisco Afaf Meleis the dean of the University of Pennsylvania School of Nursing presents for the first time in a single volume her original transitions theory that integrates middle range theory to assist nurses in facilitating positive transitions for patients families and communities Nurses are consistently relied on to coach and support patients going through major life transitions such as illness recovery pregnancy old age and many more A collection of over 50 articles published from 1975 through 2007 and five newly commissioned articles Transitions Theory covers developmental situational health and illness organizational and therapeutic transitions Each section includes an introduction written by Dr Meleis in which she offers her historical and practical perspective on transitions Many of the articles consider the transitional experiences of ethnically diverse patients women the elderly and other minority populations Key Topics Discussed Situational transitions including discharge and relocation transitions hospital to home stroke recovery and immigration transitions psychological adaptation and impact of migration on family health Educational transitions including professional transitions from RN to BSN and student to professional Health and illness transitions including self care post heart failure living with chronic illness living with early dementia and accepting palliative care Organization transitions including role transitions from acute care to collaborative practice and hospital to community practice Nursing therapeutics models of transition including role supplementation models and debriefing models     Geriatric Oncology Arti Hurria,Lodovico Balducci,2009-07-14 Cancer and aging are integrally related Cancer incidence and mortality increase with age with most cancer diagnoses and deaths occurring in patients aged 65 and older The aging of the Baby Boomer population along with an overall increase in life expectancy points to a doubling of the U S population over age 65 by the year 2030 This demographic shift combined with the known association of cancer and aging is expected to bring about a rapid growth in the older cancer patient population It is clear that geriatric principles must become part of oncology care The evaluation and

development of treatment recommendations for an older adult with cancer can be challenging for many reasons Tumor biology and response to therapy are affected by age In addition age related factors may impact treatment patterns tolerance and efficacy These age related factors include functional status declines comorbid conditions changes in cognitive function weakening of organ function decreases in physiologic reserve and faltering social support
