Zech, 2013-11-11 Astronomy and Astrophysics Abstracts which has appeared in semi annual volumes since 1969 is devoted to the recording summarizing and indexing of astronomical publications throughout the world It is prepared under the auspices of the International Astronomical Union according to a resolution adopted at the 14th General Assembly in 1970 Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months This time interval is near to that achieved by monthly abstracting journals compared to which our system of accumulating abstracts for about six months offers the advantage of greater convenience for the user Volume 12 contains literature published in 1974 and received before March 15 1975 some older literature which was received late and which is not recorded in earlier volumes is also included Beginning with volume 11 some minor changes of our classification scheme have been made We acknowledge with thanks contributions to this volume by Dr J Bouska who surveyed journals and publications in the Czech language and supplied us with abstracts in English and by the Commonwealth Scientific and Industrial Research Organization CSIRO Sydney for providing titles and abstracts of papers on radio astronomy *Nuclear Science Abstracts*, 1976 **Photochemistry** D Bryce-Smith, 2007-10-31 The breadth of scientific and technological interests in the general topic of photochemistry is truly enormous and includes for example such diverse areas as microelectronics atmospheric chemistry organic synthesis non conventional photoimaging photosynthesis solar energy conversion polymer technologies and spectroscopy This Specialist Periodical Report on Photochemistry aims to provide an annual review of photo induced processes that have relevance to the above wide ranging academic and commercial disciplines and interests in chemistry physics biology and technology In order to provide easy

access to this vast and varied literature each volume of Photochemistry comprises sections concerned with photophysical processes in condensed phases organic aspects which are sub divided by chromophore type polymer photochemistry and photochemical aspects of solar energy conversion Volume 34 covers literature published from July 2001 to June 2002 Specialist Periodical Reports provide systematic and detailed review coverage in major areas of chemical research Compiled by teams of leading authorities in the relevant subject areas the series creates a unique service for the active research chemist with regular in depth accounts of progress in particular fields of chemistry Subject coverage within different volumes of a given title is similar and publication is on an annual or biennial basis **Literature 1972, Part 2** S. Böhme, W. Fricke, U. Güntzel-Lingner, F. Henn, D. Krahn, U. Scheffer, G. Zech, 2013-04-18 Astronomy and Astrophysics Abstracts which has appeared in semi annual volumes since 1969 is devoted to the recording summarizing and indexing of astronomical publications throughout the world It is prepared under the auspices of the International Astronomical Union according to a resolution adopted at the 14th General Assembly in 1970 Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months This time interval is near to that achieved by monthly abstracting journals compared to which our system of accumulating abstracts for about six months offers the advantage of greater convenience for the user Volume 8 contains literature published in 1972 and received before March 15 1973 some older literature which was received late and which is not recorded in earlier volumes is also included *Books in Print*, 1991 **Standard Reference Data Publications, 1964-1984** Joan C. F. G. Johnson, 1976 Annotation Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research Written by experts in their specialist fields the series creates a unique service for the active research chemist supplying regular critical in depth accounts of progress in particular areas of chemistry For over 80 years the Royal Society of Chemistry and its predecessor the Chemical Society have been publishing reports charting developments in chemistry which originally took the form of Annual Reports However by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born The Annual Reports themselves still existed but were divided into two and subsequently three volumes covering Inorganic Organic and Physical Chemistry For more general coverage of the highlights in chemistry they remain a must Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry Some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued The current list of

1969 is devoted to the recording summarizing and indexing of astronomical publications throughout the world It is prepared
under the auspices of the International Astronomical Union according to a resolution adopted at the 14th General Assembly
in 1970 Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation of literature in all fields of
astronomy and astrophysics Every effort will be made to ensure that the average time interval between the date of receipt of
the original literature and publication of the abstracts will not exceed eight months This time interval is near to that achieved
by monthly abstracting journals compared to which our system of accumulating abstracts for about six months offers the
advantage of greater convenience for the user Volume II contains literature published in 1974 and received before August 1974
some older literature which was received late and which is not recorded in earlier volumes is also included Beginning
with this volume some minor changes of our classification scheme have been made We acknowledge with thanks
contributions to this volume by Dr J Bouška who surveyed journals and publications in the Czech language and supplied us
with abstracts in English and by the Commonwealth Scientific and Industrial Research Organization CSIRO Sydney for
providing titles and abstracts of papers on radio astronomy **American Book Publishing Record** ,1977-03-31 Here is

Volume 6 ,1973 Annotation As a spectroscopic method Nuclear Magnetic Resonance NMR has seen spectacular growth over
the past two decades both as a technique and in its applications Today the applications of NMR span a wide range of
scientific disciplines from physics to biology to medicine Each volume of Nuclear Magnetic Resonance comprises a
combination of annual and biennial reports which together provide comprehensive coverage of the literature on this topic This
Specialist Periodical Report reflects the growing volume of published work involving NMR techniques and applications in
particular NMR of natural macromolecules which is covered in two reports NMR of Proteins and Acids and NMR of
Carbohydrates Lipids and Membranes For those wanting to become rapidly acquainted with specific areas of NMR this title
provides unrivalled scope of coverage Seasoned practitioners of NMR will find this an invaluable source of current methods
and applications Specialist Periodical Reports provide systematic and detailed review coverage in major areas of chemical
research Compiled by teams of leading authorities in the relevant subject areas the series creates a unique service for the
