Photographers Britain The Highlands:

Francis Bedford, Landscape Photography and Nineteenth-century British Culture Stephanie Spencer, 2011
Focusing on one representative figure Francis Bedford this study emphasizes how photographs operated to form and transmit cultural ideas and values The first writing on Bedford since the 1970s the book examines this premier photographer who was also commercially successful Major themes include the intersection of nature and culture the practice of nineteenth century tourism attitudes toward historical identity and the formation of a national identity in England and Wales **The British Journal of Photography** ,1875 **British Journal Photographic Annual** ,1891 **Photography, Natural History and the Nineteenth-Century Museum** Kathleen Davidson, 2017-12-02 The Victorian era heralded an age of transformation in which momentous changes in the field of natural history coincided with the rise of new visual technologies Concurrently different parts of the British Empire began to more actively claim their right to being acknowledged as indispensable contributors to knowledge and the progress of empire This book addresses the complex relationship between natural history and photography from the 1850s to the 1880s in Britain and its colonies Australia New Zealand and to a lesser extent India Coinciding with the rise of the modern museum photography's arrival was timely and it rapidly became an essential technology for recording and publicising rare objects and valuable collections Also during this period the medium assumed a more significant role in the professional practices and reputations of naturalists than has been previously recognized and it figured increasingly within the expanding specialized networks that were central to the production and dissemination of new knowledge In an interrogation that ranges from the first forays into museum photography and early attempts to document collecting expeditions to the importance of traditional and photographic portraiture for the recognition of scientific discoveries this book not only recasts the parameters of what we actually identify as natural history photography in the Victorian era but also how we understand the very structure of empire in relation to this genre at that time About Britain; Photographs by Michael Peto Kenneth Harris, 1967 The British Journal Photographic Almanac and Photographer's Daily Companion ,1881 *Writing, Authorship and Photography in British Literary Culture, 1880 - 1920* Emily Ennis, 2022-03-24 At the turn of the 20th century printing and photographic technologies evolved rapidly leading to the birth of mass media and the rise of the amateur photographer Demonstrating how this development happened symbiotically with great changes in the shape of British literature *Writing Authorship and Photography in British Literary Culture 1880 1920* explores this co evolution showing that as both writing and photography became tools of mass dissemination literary writers were forced to re evaluate their professional and personal identities Focusing on four key authors Thomas Hardy Bram Stoker Joseph Conrad and Virginia Woolf each of which had their own private and professional connections to photographs this book offers valuable historical contexts for contemporary cultural developments and anxieties At first establishing the authors response to developing technologies through their non fiction personal correspondences and working drafts Ennis

moves on to examine how their perceptions of photography extend into their major works of fiction *A Laodicean Dracula* *The Secret Agent* *The Inheritors* and *The Voyage Out* Reflecting on the first graphic revolution in a world where text and image are now reproduced digitally and circulated en masse and online Ennis redirects our attention to when image and text appeared alongside each other for the first time and the crises this sparked for authors how they would respond to increasingly photographic depictions of everyday life and in turn how their writing adapted to a distinctly visual mass media

Capturing Japan in Nineteenth-century New England Photography Collections Eleanor M. Hight, 2011 Expanding the canon of photographic history *Capturing Japan in Nineteenth Century New England Photography Collections* focuses on six New Englanders whose travel and photograph collecting influenced the flowering of Japonism in late nineteenth century Boston The book also explores the history of Japanese photography and its main themes The first history of its kind this study illuminates the ways photographs seeming conveyors of fact imprint mental images and suppositions on their viewers
