The Engine of Visualization Patrick Maynard, 2018-08-06 In the first philosophical book wholly about photography Patrick Maynard dispels some basic persistent confusions by treating photography as a technology a way to enhance and filter human power Once photography is understood as a kind of technology Maynard argues insights about technology may be applied to provide the general perspective on photography that has been missing **Living Pictures** Noa Turel, 2020-09-25 A significant new interpretation of the emergence of Western pictorial realism When Jan van Eyck c 1390 1441 completed the revolutionary Ghent Altarpiece in 1432 it was unprecedented in European visual culture His novel visual strategies including lifelike detail not only helped make painting the defining medium of Western art they also ushered in new ways of seeing the

world This highly original book explores Van Eyck's pivotal work as well as panels by Rogier van der Weyden and their followers to understand how viewers came to appreciate a world depicted in two dimensions Through careful examination of primary documents Noa Turel reveals that paintings were consistently described as *au vif* made not from life but into life Animation not representation drove Van Eyck and his contemporaries Turel's interpretation reverses the commonly held belief that these artists were inspired by the era's burgeoning empiricism proposing instead that their living pictures helped create the conditions for empiricism Illustrated with exquisite fifteenth century paintings this volume asserts these works key role in shaping rather than simply mirroring the early modern world *Capturing the Light* Roger Watson, Helen Rappaport, 2024-05-01 A thoroughly enjoyable account of the English scientist and the French artist each toiling alone who invented modern photography The Wall Street Journal During the 1830s in an atmosphere of intense scientific inquiry fostered by the industrial revolution two quite different men one in France one in England developed their own dramatically different photographic processes in total ignorance of each other's work These two lone geniuses Henry Fox Talbot in the seclusion of his English country estate at Lacock Abbey and Louis Daguerre in the heart of post revolutionary Paris through diligence disappointment and sheer hard work overcame extraordinary odds to achieve the one thing man had for centuries been trying to do to solve the ancient puzzle of how to capture the light and in so doing make nature paint its own portrait With the creation of their two radically different processes the Daguerreotype and the Talbotype these two giants of early photography changed the world and how we see it Drawing on a wide range of original contemporary sources and featuring plates in color sepia and black and white many of them rare or previously unseen *Capturing the Light* charts an extraordinary tale of genius rivalry and human resourcefulness in the quest to produce the world's first photograph Energetically written and deftly paced gripping popular history Publishers Weekly *Depression Glass* Monique Vescia, 2014-02-04 First Published in 2006 This is part of the literary criticism and cultural theory collection Situated within the larger narrative of the symbiosis between photography and modern poetry in America during the 1930s each text examined by the author is a discrete object constituting a series of empirical statements expressing certain empirical truths particular to its time and place **Concise Dictionary of Women Artists** Delia Gaze, 2013-04-03 This book includes some 200 complete entries from the award winning Dictionary of Women Artists as well as a selection of introductory essays from the main volume *How Photography Became Contemporary Art* Andy Grundberg, 2021-02-23 A leading critic's inside story of the photo boom during the crucial decades of the 1970s and 80s When Andy Grundberg landed in New York in the early 1970s as a budding writer photography was at the margins of the contemporary art world By 1991 when he left his post as critic for the New York Times photography was at the vital center of artistic debate Grundberg writes eloquently and authoritatively about photography's boom years chronicling the medium's increasing role within the most important art movements of the time from Earth Art and Conceptual Art to performance and video He also traces photography's embrace by museums and

galleries as well as its politicization in the culture wars of the 80s and 90s Grundberg reflects on the landmark exhibitions that defined the moment and his encounters with the work of leading photographers many of whom he knew personally including Gordon Matta Clark Cindy Sherman and Robert Mapplethorpe He navigates crucial themes such as photography's relationship to theory as well as feminism and artists of color Part memoir and part history this perspective by one of the period's leading critics ultimately tells a larger story about the crucial decades of the 70s and 80s through the medium of photography

Invisibility in Visual and Material Culture Asbjørn Grønstad, Øyvind Vågnes, 2019-06-01 The essays in *Invisibility in Visual and Material Culture* contribute pioneering and revelatory insights into the phenomenon of invisibility forging new and multi disciplinary approaches at the intersection of aesthetics technology representation and politics Importantly they acknowledge the complex interaction between invisibility and its opposite visibility arguing that the one cannot be fully grasped without the other Considering these entanglements across different media forms the chapters reveal that the invisible affects many cultural domains from digital communication and operative images to the activism of social movements as well as to identity race gender and class issues Whether the subject is comic books photographic provocations biometric and brainwave sensing technologies letters or a cinematic diary the analyses in this book engage critically and theoretically with the topic of invisibility and thus represent the first scholarly study to identify its importance for the field of visual culture

First Exposures Steffen Siegel, 2017-08-01 An exact date for the invention of photography is evasive Scientists and amateurs alike were working on a variety of photographic processes for much of the early nineteenth century Thus most historians refer to the year 1839 as the first year of photography not because the sensational new medium was invented then but because that is the year it was introduced to the world After more than 175 years and for the first time in English *First Exposures Writings from the Beginning of Photography* brings together more than 130 primary sources from that very year 1839 subdivided into ten chapters and accompanied by fifty three images of significant visual and historical importance This is an astonishing work of discovery selection and thanks to Steffen Siegel's introductory texts notes and afterword elucidation The range of material is impressive not only all the chemical and technological details of the various processes but also contracts speeches correspondence of every kind arguments parodies satires eulogies denunciations journals and even some poems Revealing through firsthand accounts the competition the rivalries and the parallels among the various practitioners and theorists this book provides an unprecedented way to understand how the early discourse around photographic techniques and processes transcended national boundaries and interconnected across Europe and the United States

of a series of scenes that defined modernism Aisthesis takes its reader from Dresden in 1764 to New York in 1941 Along the way we view the Belvedere Torso with Winckelmann accompany Hegel to the museum and Mallarmé to the Folies Bergère attend a lecture by Emerson visit exhibitions in Paris and New York factories in Berlin and film sets in Moscow and Hollywood Rancière uses these sites and events to ask what becomes art and what comes from it This incisive study provides a history of artistic modernity far removed from the conventional postures of modernism

The Photographs of Frederick H. Evans Anne M. Lyden, 2010-02-01 A collection of architectural and landscape photographs taken by British photographer Frederick H Evans and features an essay that describes the life and accomplishments of Evans *W.G. Sebald's Hybrid Poetics* Lynn L. Wolff, 2014-04-02 This book offers a new critical perspective on the perpetual problem of literature's relationship to reality and in particular on the sustained tension between literature and historiography The scholarly and literary works of W G Sebald 1944 2001 serve as striking examples for this discussion for the way in which they demonstrate the emergence of a new hybrid discourse of literature as historiography This book critically reconsiders the claims and aims of historiography by re evaluating core questions of the literary discourse and by assessing the ethical imperative of literature in the 20th and 21st centuries Guided by an inherently interdisciplinary framework this book elucidates the interplay of epistemological aesthetic and ethical concerns that define Sebald's criticism and fiction Appropriate to the way in which Sebald's works challenge us to rethink the boundaries between discourses genres disciplines and media this work proceeds in a methodologically non dogmatic way drawing on hermeneutics semiotics narratology and discourse theory In addition to contextualizing Sebald within postwar literature in German the book is the first English language study to consider Sebald's oeuvre as a whole Of interest for Sebald experts and enthusiasts literary scholars and historians concerned with the problematic of representing the past

3D Jens Schröter, 2014-01-30 There is a blind spot in recent accounts of the history theory and aesthetics of optical media namely the field of the three dimensional or trans plane image It has been widely used in the 20th century for very different practices military scientific and medical visualization precisely because it can provide more spatial information And now in the 21st century television and film are employing the method even more Appearing for the first time in English Jens Schroeter's comprehensive study of the aesthetics of the 3D image is a major scholarly addition to this evolving field Citing case studies from the history of both technology and the arts this wide ranging and authoritative book charts the development in the theory and practice of three dimensional images Discussing and analyzing the transformation of the socio cultural and technological milieu Schroeter has produced a work of scholarship that combines impressive historical scope with contemporary theoretical arguments
