critical approaches and methodologies      *The Representation of the Struggling Artist in America, 1800-1865* Erika Schneider, 2015-04-23 The Representation of the Struggling Artist in America 1800 1865 analyzes how American painters sculptors and writers active between 1800 and 1865 depicted their response to a democratic society that failed to adequately support them financially and intellectually Without the traditional European forms of patronage from the church or the crown American artists faced unsympathetic countrymen who were unaccustomed to playing the role of patron and less than generous in rewarding creativity It was in this unrewarding landscape that American artists in the first half of the nineteenth century employed the struggling or starving artist image to satirize the country's lack of patronage and immortalize their own struggles Through an examination of artists journals letters and biographies as well as the development of art academies and exhibition venues this study traces the evolution of a young nation that went from considering artists as mere craftsmen to recognizing them as important members of a civilized society      **Unseeing Empire** Bakirathi Mani, 2020-10-26 In Unseeing Empire Bakirathi Mani examines how empire continues to haunt South Asian American visual cultures Weaving close readings of fine art together with archival research and ethnographic fieldwork at museums and galleries across South Asia and North America Mani outlines the visual and affective relationships between South Asian diasporic artists their photographic work and their viewers She notes that the desire for South Asian Americans to see visual representations of themselves is rooted in the use of photography as a form of colonial documentation and surveillance She examines fine art photography by South Asian diasporic artists who employ aesthetic strategies such as duplication and alteration that run counter to viewers demands for greater visibility These works fail to deliver on viewers desires to see themselves producing instead feelings of alienation estrangement and loss These feelings Mani contends allow viewers to question their own visibility as South Asian Americans in U S public culture and to reflect on their desires to be represented      Lewis Hine Timothy J. Duerden, 2018-04-26 Nearly 80 years after his death Lewis Hine's name is revered in the world of photography and practically synonymous with the labor reforms of the Progressive Era His body of work much of it a century old or more remains vital as both aesthetic statement and social document Drawing on a range of sources including information from surviving family members this first full length illustrated biography presents a detailed and personal portrait of the sociologist and photographer whose haunting images of children at work in cotton mills and coal mines sparked the movement to end child labor culminating with the Fair Labor Standards Act of 1938 There are 62 of his penetrating photographs included      **Guernica** Gijs van Hensbergen, 2013-01-03 The remarkable story of the famous painting by Picasso and its diverse meanings from its conception to the present day Enthralling This is high action drama told like the rest within a huge frame of reference theme interlocked with theme A painting which began its life within a particular political context has emerged as a universal statement on the ever present horror and suffering of war Van Hensbergen has treated an extraordinary subject admirably Evening Standard Of all the great paintings in the world Picasso's Guernica has had a more

direct impact on our consciousness than perhaps any other In this absorbing and revealing book Gijs van Hensbergen tells the story of this masterpiece Starting with its origin in the destruction of the Basque town of Gernika in the Spanish Civil War the painting is then used as a weapon in the propaganda battle against Fascism Later it becomes the nucleus of the Museum of Modern Art in New York and the detonator for the Big Bang of Abstract Expressionism in the late 1940s This tale of passion and politics shows the transformation of this work of art into an icon of many meanings up to its long contested but eventually triumphant return to Spain in 1981

**Global Trade and Visual Arts in Federal New England** Patricia Johnston, Caroline Frank, 2014-11-04 A highly original and much needed collection that explores the impact of Asian and Indian Ocean trade on the art and aesthetic sensibilities of New England port towns in the late eighteenth and early nineteenth centuries This diverse interdisciplinary volume adds to our understanding of visual representations of economic and cultural changes in New England as the region emerged as a global trading center entering the highly prized East Indies trades Examining a wide variety of commodities and forms including ceramics textiles engravings paintings architecture and gardens the contributors highlight New Englanders imperial ambitions in a wider world This book will appeal to a broad audience of historians and students of American visual art as well as scholars and students of fine and decorative arts

*Nineteenth-Century Photographs and Architecture* Micheline Nilsen, 2017-07-05 Eschewing the limiting idea that nineteenth century architecture photography merely reflects functionality the objective of this collection is to reflect the aesthetic intellectual and cultural concerns of the time The essays hold appeal for social and cultural historians as well as those with an interest in the fields of art history urban geography history of travel and tourism Nineteenth century photographers captured what could be seen and what they wanted to be seen Their images informed of exploration progress heritage and destruction Architecture was a staple subject for the first generation of photographers as it patiently tolerated the long exposures of the early processes During its formative decades photography responded to evolutionary cultural forces of market and artistic production Photographs of architecture reflected a specific political or social context modulated through individual points of view For this reason the examination of each photographic image as a primary visual document and an aesthetic object rather than a technical milestone on a chronological trajectory affords a richer multi faceted approach to the extensive and complex corpus of photographs taken by photographers all over the world This project acknowledges the importance of technique in the early decades of photography but focuses on the thematic content of the material It places the photography of architecture in an international context under the contemporary critical lens sharpened by theoretical and cultural examinations of the topic
