Carrithers, Jr.,1992-01-01 Though of diverse backgrounds and training Mumford Tate and Eiseley shared remarkably concordant and convincing views of the state of twentieth century American society All three considered America to be benighted by a dominant myth the myth of the machine in Mumford s phrase that resulted in cultural degeneration Through an examination of selected works of each critic Carrithers explains how these writers both identified and fought against this myth Carrithers asserts that Mumford Tate and Eiseley in their essays revived prophecy as a mode of expression and as a means of appraising culture in a broad historical context Like the biblical prophets the three concerned themselves not so much with the future as with the present They sought to unmask the falseness the moral emptiness of a reductive abstractive mechanized model of the world Carrithers considers Mumford as he moved from conflicted stances in the four volumes of *The Renewal of Life* to the more assured and comprehensive vision of society he portrayed in the two volume *The Myth of the Machine* He examines Tate s critique of American culture as it developed from his youthful involvement with the Fugitives and Agrarians to in later years an increasingly coherent but comber construal of the world s plight Finally he describes Eiseley s fully emergent rejection of reductive scientism and temporalism a large part of all that is crushing us Eiseley wrote evident in *The Immense Journey*and other books Mumford Tate and Eiseley these watchers in the night all wrote against the grain of most of their contemporaries posing questions about generally accepted current values and proffering alternatives that would make the world a more humane and transcendent place Gale Carrithers thoughtful chalenging analysis of their efforts will be required reading for anyone who wishes a better understanding of our age **American Literature and Science** Robert Scholnick,2021-10-21 Literature and science are two disciplines are two disciplines often thought to be unrelated if not actually antagonistic But Robert J Scholnick points out that these areas of learning up through the beginning of the nineteenth century were understood as parts of a unitary endeavor By mid century they had diverged but literature and science have continued to interact conflict and illuminate each other In this innovative work twelve leaders in this emerging interdisciplinary field explore the long engagement of American writers with science and uncover science s conflicting meanings as a central dimension of the nation s conception of itself Reaching back to the Puritan poet minister physician Edward Taylor who wrote at the beginning of the scientific revolution and forward to Thomas Pynchon novelist of the cybernetic age this collection of original essays contains essential work on major writers including Franklin Jefferson Poe Emerson Thoreau Twain Hart Crane Dos Passos and Charles Olson Through its exploration of the ways that American writers have found in science and technology a vital imaginative stimulus even while resisting their destructive applications this book points towards a reconciliation and integration within culture An innovative look at a neglected dimension of our literary

tradition American Literature and Science stands as both a definition of the field and an invitation to others to continue and extend new modes of inquiry
