Digital Material Ann-Sophie Lehmann, Joost Raessens, Mirko Tobias Schäfer, Marianne Boomen, 2025-10-01 Three decades of societal and cultural alignment of new media have yielded a host of innovations trials and problems accompanied by versatile popular and academic discourse New Media Studies crystallized internationally into an established academic discipline and this begs the question where do we stand now Which new questions are emerging now that new media are being taken for granted and

which riddles are still unsolved Is contemporary digital culture indeed all about you the participating user or do we still not really understand the digital machinery and how this constitutes us as you The contributors to the present book all employed in teaching and researching new media and digital culture assembled their digital material into an anthology covering issues ranging from desktop metaphors to Web 2.0 ecosystems from touch screens to blogging and e learning from role playing games and cybergothic music to wireless dreams Together the contributions provide a showcase of current research in the field from what may be called a digital materialist perspective A compelling study of the often controversial role and meaning of the new media and digital cultures in contemporary society Listening Devices Jens Gerrit Papenburg, 2023-05-04 From 1940 to 1990 new machines and devices radically changed listening to music Small and large single records new kinds of jukeboxes and loudspeaker systems not only made it possible to playback music in a different way they also evidence a fundamental transformation of music and listening itself Taking the media and machines through which listening took place during this period Listening Devices develops a new history of listening Although these devices were and often still are easily accessible up to now we have no concept of them To address this gap this volume proposes the term listening device In conjunction with this concept the book develops an original and fruitful method for exploring listening as a historical subject that has been increasingly organized in relation to technology Case studies of four listening devices are the points of departure for the analysis which leads the reader down unfamiliar paths traversing the popular sound worlds of 1950s rock n roll culture and the disco and club culture of the 1970s and 1980s Despite all the characteristics specific to the different listening devices they can nevertheless be compared because of the fundamental similarities they share they model and manage listening they actively mediate between the listener and the music heard and it is this mediation that brings both listener and the music listened to into being Ultimately however the intention is that the listening devices themselves should not be heard so that the music they playback can be heard Thus they take the history of listening to its very limits and confront it with its other a history of non listening The book proposes listening device as a key concept for sound studies popular music studies musicology and media studies With this conceptual key a new productive understanding of past music and sound cultures of the pre digital era can be unlocked and not least of the listening culture of the digital present

Deutsche Texte des Mittelalters zwischen Handschriftennähe und Rekonstruktion Martin Schubert, 2011-12-22 Der Band dokumentiert die auf der Berliner Editionstagung von 2004 lebhaft diskutierten Fragen des Verhältnisses von Überlieferung und Edition von Handschriftentexte und rekonstruiertem Text In derblicks und Projektbeiträge vom Althochdeutschen bis zum spätmittelalterlichen Fastnachtspiel werden Fragen der Textkonstitution und des Stellenwerts der Handschriftenzeugnisse erörtert und ein breites Spektrum der anhand des jeweiligen Überlieferungsbefunds zu wählenden Editionstypen aufgefächert Ergänzend treten Beiträge zu den editorischen Paratexten und zu elektronischen Editionsformen hinzu *The British National Bibliography* Arthur James Wells, 2005 **Interdiscipline** Petar Ramadanovic, 2021-11-29 This book brings together two different discussions on the value of the humanities and a broader debate on interdisciplinary scholarship in order to propose a new way beyond current threats to the humanities Petar Ramadanovic offers nothing short of a drastic rehaul of our approaches to literary scholarship the humanities and university systems Beginning with an analysis of what is often referred to as the crises in the humanities the author looks at the specifics of literary studies but also issues around working conditions for academics From precarity and pay conditions to peer review the book has practical as well as theoretical implications that will resonate throughout the humanities While most books defending the humanities emphasize the uniqueness of the subject or area Ramadanovic does the opposite emphasizing the need for interdisciplinarity and combined knowledge This proposal is then fully explored through literary studies and its potential throughout the humanities and beyond into the sciences Interdiscipline is not just a defense of literature and the humanities it offers a clear and inspiring pathway forwards drawing on all disciplines to show their cultural and social significance The book is important reading for all scholars of literary studies and also throughout the humanities **Forthcoming Books** Rose Arny, 2003
