Methods of Cell Separation
Nicholas Catsimpoolas, 2012-12-06
Presently the need for methods involving separation identification and characterization of different kinds of cells is amply realized among immunologists hematologists cell biologists clinical pathologists and cancer researchers Unless cells exhibiting different functions and stages of differentiation are separated from one another it will be exceedingly difficult to study some of the molecular mechanisms involved in cell recognition specialization interactions cytotoxicity and transformation Clinical diagnosis of diseased states and use of isolated cells for therapeutic e.g. immunotherapy or survival e.g. transfusion purposes are some of the pressing areas where immediate practical benefits can be obtained by applying cell separation techniques However the development of such useful methods is still in its infancy A number of good techniques exist based either on the physical or biological properties of the cells and these have produced some valuable results Still others are to be discovered Therefore the purpose of this open end treatise is to acquaint the reader with some of the basic principles instrumentation and procedures presently in practice at various laboratories around the world and to present some typical applications of each technique to particular biological problems To this end I was fortunate to obtain the contribution of certain leading scientists in the field of cell separation people who in their pioneering work have struggled with the particular problems involved in separating living cells and in some way have won

Microspheres: Medical and Biological Applications (1988) Alan Rembaum, Zoltan A. Tokes, 2017-11-22
We have previously described the syntheses of both magnetic and nonmagnetic polymeric microspheres and we have reported their application in removal of neuroblastoma cells from normal cells in bone marrow in the separation of red blood cells and the separation of human B and T lymphocytes In the present study we describe a series of hydrophilic microspheres consisting of 1 poly HEMA and 2 a copolymer sequence of HEMA acrolein microspheres

Industrial Chemical Separation Timothy C. Frank, Bruce S. Holden, 2023-08-07
A fresh new treatment written by industry insiders this work gives readers a remarkably clear view into the world of chemical separation The authors review distillation extraction adsorption crystallization and the

use of membranes providing historical perspective explaining key features and offering insights from personal experience The book is for engineers and chemists with current or future responsibility for chemical separation on a commercial scale in its design operation or improvement or for anyone wanting to learn more about chemical separation from an industrial point of view The result is a compelling survey of popular technologies and the profession one that brings the art and craft of chemical separation to life Ever wonder how popular separation technologies came about how a particular process functions or how mass transfer units differ from theoretical stages Or perhaps you want some pointers on how to begin solving a separation problem You will find clear explanations and valuable insights into these and other aspects of industrial practice in this refreshing new survey
