

METROPOLITAN PROBLEMS

Racism, Poverty, Crime, Housing, and Fiscal Crisis

Until recently, urban problems were city problems. That is no longer the case as the issues once associated with the large, compact settlement form have spread out, like the metropolitan population and its economic activities, to characterize the entire urban region. In the late 1960s and 1970s, especially during President Johnson's Great Society, urban problems were defined almost exclusively as those involving racial segregation, poverty, violent crime, and drugs. Now, in the first decade of the twenty-first century, poverty, unemployment, foreclosures, and homelessness, as well as the severe economic recession itself, are particular issues of concern. As the attention of the federal government in Washington, D.C., focuses on the major issues of the economy and health care, the nation's state governments seem to be ignored. Consequently, adding to our other urban ills, we currently face more intense fiscal crises and their impact on local public services and infrastructure.

Was there ever a baseline in America against which the problems of today can be measured? As in the other industrialized capitalist countries of Europe, the quality of urban life with the advent of capitalism in the 1800s was severe for all but the wealthy. Early photographic images of American cities at the turn of the last century feature overcrowding; immense traffic jams of primitive Model-T automobiles mixed in with horse-drawn carts, tenements teeming with immigrants, and crowds of children swarming across city streets. Until after World War II, city life in the United States was plagued by frequent public health crises such as cholera outbreaks, high infant mortality rates, alcoholism, domestic violence, street gang activity, and crime. For much of our history, then, city life has been virtually synonymous with social problems. Yet we know now that these same problems—crime, disease, family breakup—are experienced everywhere.

The sociologists of the early Chicago School, in the 1920s and 1930s, believed that the move to the city was accompanied by social disorganization. While subsequent research showed that this perception was inaccurate, people in the United States still rank small and middle-size cities or suburbs as providing the highest quality of life and

Metropolitan Problems International Perspectives A Search For Comprehensive Ve:

Metropolitan problems: international perspectives; a search for comprehensive solutions S.R. Miles, 1970

Metropolitan Problems S. Miles, 2013-05-13 Metropolitan Problems is the end product of one of the most dynamic research programmes of its kind ever conceived and executed. The book, which took three years to complete, represents the culmination of a two-year study that was highlighted by a conference held in Toronto in 1967. In the early 1960s, the Bureau of Municipal Research in Metropolitan Toronto decided that a significant way for it to celebrate Canada's centennial would be to initiate a systematic international study of the world's metropolitan areas. The study, with the official cooperation of the United Nations, was designed to produce positive insights into the methods of coping with the interlocking sets of problems associated with the expansion of the modern metropolis. Twelve papers on various aspects of metropolitan problems were commissioned from an international body of experts. Working with these experts were study groups drawn from forty major metropolitan centres throughout the world. After making exhaustive studies of their respective urban centres, the groups reported their findings and submitted detailed briefs through their representatives at the conference. Throughout the symposium, a conscious effort was made to examine single aspects of social, economic, and physical change within the overall perspective of the metropolis. The book reflects this approach. Each chapter directs attention to specific problems of the metropolis, problems resulting from the contradiction between accelerating technology and our ability to cope with the incredible pace and rate of change. Together, they prove that despite differences in technology, culture, and political and social matters, the major urban areas of the world do have much in common. Emerging tendencies can be analysed, and corrective and preventative measures can be made through comparative analysis. This book was first published in 1970.

Metropolitan Problems Simon R. Miles, 2007 **Housing and Planning References**, 1971 **Mega Urban Regions of Southeast Asia** Ira M. Robinson, 2011-11-01 A distinguishing feature of recent urbanization in the ASEAN countries of Thailand, Malaysia, the Philippines, Singapore, and Indonesia is the outward extension of their mega cities: Bangkok, Jakarta, Manila, Singapore, and Kuala Lumpur, beyond the metropolitan borders, resulting in the establishment of new towns, industrial estates, and housing projects in previously rural areas. This process has both positive and negative effects. On one side, household incomes and employment opportunities are increasing, but on the other, the growth often causes serious problems in terms of environmental deterioration, conflicting land uses, and inadequate housing and service provisions. **Mega Urban Regions of Southeast Asia** is the first comprehensive work on the subject of ASEAN mega urban regions. The contributors review T. G. McGee's original idea of 'desakota' zones and offer arguments both for and against this concept, making a significant contribution to our understanding of the true face of ASEAN cities. The book brings together authors from around the world and will be of interest to a wide audience, including demographers, urban planners, geographers, sociologists, economists, civil servants, and development consultants. **The Oxford Dictionary of Architecture** James Stevens Curl, Susan

Wilson, 2015-02-26 Containing over 6 000 entries from Aalto to Zwinger and written in a clear and concise style this authoritative dictionary covers architectural history in detail from ancient times to the present day It also includes concise biographies of hundreds of architects from history excluding living persons from Sir Francis Bacon and Imhotep to Liang Ssu ch eng and Francis Inigo Thomas The text is complemented by over 260 beautiful and meticulous line drawings labelled cross sections and diagrams These include precise drawings of typical building features making it easy for readers to identify particular period styles This third edition of The Oxford Dictionary of Architecture has been extensively revised and expanded with over 900 new entries including hundreds of definitions of garden and landscape terms such as Baroque garden floral clock hortus conclusus and Zen garden design Each entry is followed by a mini bibliography with suggestions for further reading The full bibliography to the first edition previously only available online has also been fully updated and expanded and incorporated into this new edition This is an essential work of reference for anyone with an interest in architectural and garden history With clear descriptions providing in depth analysis it is invaluable for students professional architects art historians and anyone interested in architecture and garden design and provides a fascinating wealth of information for the general reader

Human Settlements Sam Stuart, 2013-10-02 Human Settlements An Annotated Bibliography is an annotated bibliography on human settlements and includes books journal articles reports and documents Documents from Habitat United Nations Conference on Human Settlements with National Reports are arranged alphabetically by country along with other Conference documents This book is comprised of four chapters and begins with a list of books journal articles reports and documents dealing with topics such as housing policies housing problems in underdeveloped areas and the effects of land reform and rural ordinance programs The next chapter is devoted to a bibliography of bibliographies covering topics ranging from land use planning to rural roads and their potential The third chapter includes national reports from countries such as Afghanistan Algeria and Bangladesh The bibliography concludes with a subject index of key words subdivided geographically a secondary author index that includes personal and corporate authors editors compilers and authors of significant introductions and a list of libraries consulted This monograph should be of interest to housing officials and policymakers
