New Directions in Contemporary

Architecture Luigi Prestinenza Puglisi, 2008-05-05 Rem Koolhaas has defined architecture as a chaotic adventure Nothing could be more true than that of the last two decades Never has architecture been so unbridled and so extraordinary the architectural cast has never been so wide and their works so diverse What though if you are new to the subject How is it possible to make sense of this seemingly unruly architectural landscape There are so many different types of architecture so many designers with such varying and even contradictory approaches This book is a much needed navigation guide for anyone interested in modern architecture Organised chronologically it enables you to find your way through one of the most prolific periods of building design It looks at buildings in often contrasting styles that have been built almost simultaneously across the world with their roots in very different tendencies and schools of thought A loose but effective framework is provided which pulls all these multiple threads together while key buildings are described individually with a unique clarity and precision Aaron Betsky Director of Cincinnati Art Museum Comprehensive coherent and cogent Puglisi's book sorts out the messy history of the last quarter century of the world's best architecture Professor Iain Borden Head Bartlett School of Architecture UCL Illuminating and insightful a must have read for students Hans Ibelings Editor of A10 new European architecture Lucid and concise Charles Jencks Architecture Critic and Author A compelling comprehensive overview of the avant garde since 1988 as it oscillates in and out of the global star system Bill Menking Editor of The Architect's Newspaper This is the first clear and systematic study of the culture of architecture from the reds of deconstruction to the sustainable greens

Architecture Thinking across Boundaries Rajesh Heynckx, Ricardo Costa Agarez, Elke Couchez, 2021-01-14 While most studies on the history of architectural theory have been concerned with what has been said and written this book is concerned with how architecture theory has been created and transmitted Architecture Thinking across Boundaries looks at architectural theory through the lens of intellectual history Eleven original essays explore a variety of themes and contexts each examining how architectural knowledge has been transferred across social spatial and disciplinary boundaries whether through the international circulation of ideas transdisciplinary exchanges or transfers from design practice to theory and back again Dissecting the frictions transformations and resistances that mark these journeys the essays in this book reflect upon the myriad routes that architectural knowledge has taken while developing into architectural theory They critically enquire the interstices geographical temporal and epistemological that lie beyond fixed narratives They show how unstable vital and eminently mobile the processes of thinking about architecture have been
