New Fragments:

Stolen Fragments Roberta Mazza, 2024-09-24 In 2012 Steve Green billionaire and president of the Hobby Lobby chain of craft stores announced a recent purchase of a Biblical artefact a fragment of papyrus just discovered carrying lines from Paul's letter to the Romans and dated to the second century CE. Noted scholar Roberta Mazza was stunned. When was this piece discovered and how could Green acquire such a rare item? The answers which Mazza spent the next ten years uncovering came as a shock: the fragment had come from a famous collection held at Oxford University and its rightful owners had no idea it had been sold. The letter to the Romans was not the only extraordinary piece in the Green collection. They soon announced newly recovered fragments from the Gospels and writings of Sappho. Mazza's quest to confirm the provenance of these priceless fragments revealed shadowy global networks that make big business of ancient manuscripts from the Green's Museum of the Bible and world famous auction houses like Sotheby's and Christie's to antique shops in Jerusalem and Istanbul, dealers on eBay and into the collections of renowned museums and universities. Mazza's investigation forces us to ask what happens when the supposed custodians of our ancient heritage act in ways that threaten to destroy it. *Stolen Fragments* illuminates how these recent dealings are not isolated events but the inevitable result of longstanding colonial practices and the outcome of generations of scholars who have profited from extracting the cultural heritage of places they claim they wish to preserve. Where is the boundary between protection and exploitation between scholarship and larceny?

Enuma Elish - the Seven Tablets of Creation Leonard W. King, 1999-07 The Babylonian and Assyrian Legends Concerning the Creation of the World and of Mankind. The *Enuma Elish* is one of the oldest stories known to mankind. It is a story first written down by the ancient Sumerians thousands of years ago. As a one-time assistant in the Department of Egyptian and Assyrian Antiquities at the British Museum, L. W. King provides us with a qualified translation of the tablets which were originally written in cuneiform script. The *Enuma Elish* is receiving renewed interest from modern researchers delving into the origins of mankind, the earth, and the solar system. Over the centuries a copy ended up in the library at Nineveh in the 7th century B.C. and was uncovered by archaeologists in the late 1800s. Written in cuneiform text and preserved on seven clay tablets, the entire story was called *The Seven Tablets of Creation*. After being translated, the story revealed how the planets became aligned, how a cosmic catastrophe affected the earth, how mankind came upon the scene, and how the gods played a role in all of it. *The Seven Tablets of Creation* have had many profound implications since they were first discovered and subsequently published. They predate many parts of the Book of Genesis as well as other worldwide creation myths. Volume One includes this epic poem's English translation. It also includes information on parallels in Hebrew literature, the date and origin of the Babylonian creation legends, and more. Volume Two includes other accounts of creation, an Assyrian Tower of Babel story, and supplementary texts showing the actual cuneiform tablets. **Android Fragments** Dave MacLean, Satya Komatineni, 2014-11-17 *Android Fragments* is a 100-page quick start accelerated guide to learning and

Carroll, 2012-01-09 Building theories of organizations is challenging theories are partial and folk categories are fuzzy The commonly used tools first order logic and its foundational set theory are ill suited for handling these complications Here three leading authorities rethink organization theory Logics of Organization Theory sets forth and applies a new language for theory building based on a nonmonotonic logic and fuzzy set theory In doing so not only does it mark a major advance in organizational theory but it also draws lessons for theory building elsewhere in the social sciences Organizational research typically analyzes organizations in categories such as bank hospital or university These categories have been treated as crisp analytical constructs designed by researchers But sociologists increasingly view categories as constructed by audiences This book builds on cognitive psychology and anthropology to develop an audience based theory of organizational categories It applies this framework and the new language of theory building to organizational ecology It reconstructs and integrates four central theory fragments and in so doing reveals unexpected connections and new insights *Paradosis and Survival* Diskin Clay, 1998 The progression of
