Cole, 2000-06-30 There has been an explosion of Web based

courses in higher education Aiming at an interdisciplinary audience the contributors draw upon diverse philosophical and empirical backgrounds to make claims about Web based pedagogy Among the points they raise is the concern that education is more easily commodified through Internet technologies implying that traditional faculty roles in teaching and research are at risk Moreover current understandings of what it means to be a teacher or a student are undergoing redefinition as a result of these new distance learning technologies The contributors note that Web based pedagogy is associated with sound instruction when particular strategies are adopted As a corollary this form of teaching is least effective when attempts are made to directly translate traditional styles of teaching Political social and economic interests are competing to shape the direction that online education will take The authors argue that opportunities exist for administrators and faculty to define the terms under which Web based learning will occur in their institutions

TELECOMMUNICATION SYSTEMS AND TECHNOLOGIES-Volume II Paolo Bellavista,2009-10-17 Telecommunication Systems and Technologies theme is a component of Encyclopedia of Physical Sciences Engineering and Technology Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias Telecommunication systems are emerging as the most important infrastructure asset to enable business economic opportunities information distribution culture dissemination and cross fertilization and social relationships As any crucial infrastructure its design exploitation maintenance and evolution require multi faceted know how and multi disciplinary vision skills The theme is structured in four main topics Fundamentals of Communication and Telecommunication Networks Telecommunication Technologies Management of Telecommunication Systems Services Cross Layer Organizational Aspects of Telecommunications which are then expanded into multiple subtopics each as a chapter These two volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs

Network Science, A Decade Later Alan Feldman,Cliff Konold,Bob Coulter,Brian Conroy,2000-01-12 Network Science A Decade Later the result of NSF funded research that looked at the experiences of a set of science projects which use the Internet offers an understanding of how the Internet can be used effectively by science teachers and students to support inquiry based teaching and learning The book emphasizes theoretical and critical perspectives and is intended to raise questions about the goals of education and the ways that technology helps reach those goals and ways that it cannot The theoretical perspective of inquiry based teaching and learning in which the book is grounded is consistent with the current discipline based curriculum standards and frameworks The chapters in Part I State of the Art describe the history and current practice of network science Those in Part II Looking Deeply extend the inquiry into network science by examining discourse and data in depth using both empirical data and theoretical perspectives In Part III Looking Forward the authors step back from the issues of network science to take a broader view focusing on the question How should the Internet be used and not used to support student learning The book concludes with a reminder that

technology will not replace teachers Rather the power of new technologies to give students both an overwhelming access to resources experts peers teachers texts images and data and the opportunity to pursue questions of their own design increases the need for highly skilled teachers and forward looking administrators This is a book for them and for all educators policymakers students involved in science and technology education For more information about the authors an archived discussions space a few chapters that can be downloaded as PDF files and ordering information visit teaparty.terc.edu/book

Bold Ventures S. Raizen, E.D. Britton, 2012-12-06 This book presents comprehensive results from case studies of five innovations in science education that have much to offer toward understanding current reforms in this field Each chapter tells the story of a case in rich detail with extensive documentation and in the voices of many of the participants the innovators the teachers the students Similarly Volume 3 of **Bold Ventures** presents the results from case studies of five innovations in mathematics education Volume 1 provides a cross case analysis of all eight innovations Many U S readers certainly will be very familiar with the name of at least one if not all of the science innovations discussed in this volume for example Project 2061 and probably with their general substance Much of the education community's familiarity with these arises from the projects own dissemination efforts The research reported in this volume however is one of the few detailed studies of these innovations undertaken by researchers outside the projects themselves Each of the five studies was a large scale effort involving teams of researchers over three years These teams analyzed many documents attended numerous critical project meetings visited multiple sites conducted dozens of individual interviews The team leaders Atkin Huberman Rowe having spent much time with science education over long careers looked at these innovations through many lenses It was a daunting task for each team to sift through the mountains of detail in order to bring the most compelling themes to the surface

Bold Ventures Volume 1 Raizen, 2012-12-06 This book based on detailed studies of eight innovations in mathematics and science education has many insights to offer on current school reform Since each innovation studied has taken its own unique approach the set as a whole spans the spectrum from curriculum development to systemic reform from concentrating on particular school populations to addressing all of K 12 education Yet these reform projects share a common context a world view on what matters in science and mathematics for students of the 1990s and beyond convictions about what constitutes effective instruction and some notions about how school change can be brought about These commonalities are drawn out in the book and illustrated with examples from the individual case studies that are reported in full in **Bold Ventures Volumes 2 and 3** The eight innovations all of them projects that are well known at least by name to U S audiences are briefly described in chapter 1 Each was the subject of an in depth three year case study The research teams analyzed many documents attended numerous project meetings visited multiple sites conducted dozens of individual interviews The team leaders having spent much time with mathematics or science education over long careers looked at these reform projects through several lenses the teams sifted through the mountains of data they had collected in order to tell the story of
