Issues in Web-Based Pedagogy Robert A. Cole,2000-06-30 There has been an explosion of Web based courses in higher education Aiming at an interdisciplinary audience the contributors draw upon diverse philosophical and empirical backgrounds to make claims about Web based pedagogy Among the points they raise is the concern that education is more easily commodified through Internet technologies implying that traditional faculty roles in teaching and research are at risk Moreover current understandings of what it means to be a teacher or a student are undergoing redefinition as a result of these new distance learning technologies The contributors note that Web based pedagogy is associated with sound instruction when particular strategies are adopted As a corollary this form of teaching is least effective when attempts are made to directly translate traditional styles of teaching Political social and economic interests are competing to shape the direction that online education will take The authors argue that opportunities exist for administrators and faculty to define the terms under which Web based learning will occur in their institutions *Technology Transfer* Goel Cohen,Gū'il Kuhan,2004-02-20 This book identifies the major factors responsible for effective transfer of information and human expertise from an advanced country or a multinational corporation to the developing world *Proceedings of the International Conference on Environmental Management in Metallurgical Industries (EMMI-2000)* ,2000 *Bridging the Digital Divide* Angathevar Baskaran,2006-01-31 The impressive advances of information and communication technologies ICT in some Asian countries have led some people to proclaim a fundamental change in the world economy It is essential still to study the experience of developing countries thoroughly and critically The authors and editors have made an admirable contribution to make such an evaluation and fill a big gap in our knowledge But it is still relatively difficult to find reliable information about the changes taking place in China or any other developing country One of the many good features of this evaluation is that it takes into account the specific relationship of ICT with the wider social and economic system and the national system of innovation of each country
