New Greenland:

Phasing Out the Colonial Status of Greenland, 1945-54 Jens Elo Rytter, 2010 With the Constitution of 1953 the colonial status of Greenland came to an end and Greenlanders were granted equal rights as citizens within the Danish realm In 1954 this new arrangement was supported by the UN General Assembly The decision to change Greenland's status was conditioned both by internal and external circumstances In the UN context Danes increasingly felt the strain of being a colonial power and they feared the possibility of future UN interference in Greenlandic affairs Greenland's Stolen Indigenous Children Helene Thiesen, 2022-11-10 In this book author Helene Thiesen recounts her experience of being removed from her family in Greenland as a young Inuk child to be re-educated in Denmark and an orphanage in Greenland The practice of forcible assimilation of Indigenous children into colonial societies through education has echoes in North America and Australasia and the painful legacy of these practices remains under-acknowledged In this poignant book Helene recounts in detail the process of being taken from her family in 1951 aged seven along with twenty one other children in the attempt to re-make them into model Danish citizens in a social experiment led by the Danish government and Save the Children Denmark When the children returned to Greenland a year and a half later they were sent to live in a Danish Red Cross orphanage where they were forbidden to speak their native languages and were compelled to adopt Danish language culture and customs With a detailed introductory analysis from Dr Stephen James Minton who also provides the translation Helene's account serves as a compelling and powerful testimony of a devastating colonial experiment Richly illustrated with forty photos to help to situate the reader this book provides an invaluable case study for researchers and students in the fields of Indigenous Studies Critical Pedagogy and Education Psychology European History and Cultural Studies The Greenland Entomofauna Jens Böcher, N.P. Kristensen (†), Thomas Pape, Lars Vilhelmsen, 2015-05-26 In *The Greenland Entomofauna* an international team of 64 taxonomic specialists provide for the first time a richly illustrated guide to the identification of the 1200 species of Hexapods Insects Arachnids and Myriapods so far known to occur in the country While the composition origin and adaptations of the Greenland fauna has always been a challenge to biogeographers and ecologists ecophysicologists the provision of a tool for detailed identification of its constituent species is now particularly timely since global climate change will expectedly have a particularly noticeable impact on biota at high latitudes This obviously renders the feasibility of monitoring distributional range shifts of the principal components of this biota a matter of some urgency Contributors are Achterberg Cornelius van Ahola Matti Bartk Miroslav Behan Pelletier Valerie Bird Jeremy M B g Katrine Brodo Fenja Buhl Peter N Dahl Christine Disney R Henry L Dittmar Katharina Fjellberg Arne Gammelmo Iivind Forshage Mattias Gerecke Reinhard Gertsson Carl Axel Haastrieter Michael M L Haenni Jean Paul Heie Ole E Heraty John M Hodgson Chris Hodgkinson Ian D Horsfield David Huber John T Jaschoff Matthias Jensen Frank Johanson Kjell A Jussila Reijo Karsholt Ole Krzeminska Ewa Lantsov Vladimir I Liska Pavel Lindegaard Claus Lyneborg Leif Makarova Olga Marusik Yura M Mathis
