Wonder Foods Lisa Haushofer, 2022-12-27. Between 1850 and 1950, experts and entrepreneurs in Britain and the United States forged new connections between the nutrition sciences and the commercial realm through their enthusiasm for new edible consumables. The resulting food products promised wondrous solutions for what seemed to be both individual and social ills. By examining creations such as Gail Borden's meat biscuit, Benger's Food, Kellogg's health foods and Fleischmann's yeast, Wonder Foods shows how new products dazzled with visions of modernity, efficiency and scientific progress, even as they perpetuated exclusionary views about who deserved to eat, thrive and live. Drawing on extensive archival research, historian Lisa Haushofer reveals that the story of modern food and nutrition was not about innocuous technological advances or superior scientific insights, but rather about the powerful logic of exploitation and economization that undergirded colonial and industrial food projects. In the process, these wonder foods shaped both modern food regimes and how we think about food.

Oil, Wine, and the Cultural Economy of Ancient Greece Catherine E. Pratt, 2021-03-18. In this book, Catherine E. Pratt explores how oil and wine became increasingly entangled in Greek culture from the Late Bronze Age to the Archaic period. Using ceramic, architectural and archaeobotanical data, she argues that Bronze Age exchange practices initiated a strong network of dependency between oil and wine production and the people who produced, exchanged and used them. After the palatial collapse, these prehistoric connections intensified during the Iron Age and evolved into the large-scale industries of the Classical period. Pratt argues that oil and wine in pre-Classical Greece should be considered cultural commodities, products that become indispensable for proper social and economic exchanges well beyond economic advantage. Offering a detailed diachronic account of the changing roles of surplus oil and wine in the economies of pre-classical Greek societies, her book contributes to a broader understanding of the complex interconnections between agriculture, commerce and culture in the ancient Mediterranean.
