costs to global society Understanding the ecology of these diverse biomes and peoples dependencies on them is fundamental to their future management and conservation Tropical Rain Forest Ecology Diversity and Conservation introduces and explores what rain forests are how they arose what they contain how they function and how humans use and impact them The book starts by introducing the variety of rain forest plants fungi microorganisms and animals emphasising the spectacular diversity that is the motivation for their conservation The central chapters describe the origins of rain forest communities the variety of rain forest formations and their ecology and dynamics The challenge of explaining the species richness of rain forest communities lies at the heart of ecological theory and forms a common theme throughout The book s final section considers historical and current interactions of humans and rain forests It explores biodiversity conservation as well as livelihood security for the many communities that are dependent on rain forests inextricable issues that represent urgent priorities for scientists conservationists and policy makers

**Africa, the Devastated Continent?** A. de Vos, 2012-12-06 Africa is not known as one of the more densely populated continents Yet the damaging marks of man s activities may be seen there dramatically Many of Africa s ecological zones are fragile Large scale soil erosion resultant cycles of drought and flash floods downgrading of fauna and flora are well known to many in general ways as well as from detailed examination of a few areas But large parts of Africa remain inaccessible Very few students of Africa have the opportunity or the tenacity to travel over these vast areas or into the hidden corners that lie beyond the well known routes of Africa As FAO s Regional Wildlife and National Parks Officer for Africa ANTOON DE VOS had the opportunity of travelling widely and studying and reporting on the acceleration of man made changes in much of the continent As an experienced practitioner of an important and difficult science ecology he has made a significant professional contribution with this book It is our hope that those who read it will be encouraged to carry on the important work and the concern with this subject to which Dr DE VOS has devoted so much of his knowledge energy and personal commitments

gross exploitation Just as television has made animals public in very particular ways it has also made new publics that have learnt to be affected by them Thanks to extraordinary access to the ABC s Natural History and general archives the authors are able to investigate the dynamic relation between making animals public and making publics over time **Bibliographic Guide to the Environment** ,1993 **Annual Report of the Executive Director** United Nations Environment Programme,1989 **The Structure and Dynamics of Human Ecosystems** William R. Tremblay,Louis Varfalvy,Charlotte Roehm,Michelle Garneau,2011-04-30 In a time when an unquestionable link between anthropogenic emissions of greenhouse gases and climatic changes has finally been acknowledged and widely documented through IPCC reports the need for precise estimates of greenhouse gas GHG production rates and emissions from natural as well as managed ecosystems has risen to a

critical level Future agreements between nations concerning the reduction of their GHG emissions will pend upon precise estimates of the present level of these emissions in both natural and managed terrestrial and aquatic environments From this viewpoint the present volume should prove to a benchmark contribution because it provides very carefully assessed values for GHG emissions or exchanges between critical climatic zones in aquatic environments and the atmosphere It also provides unique information on the biases of different measurement methods that may account for some of the contradictory results that have been published recently in the literature on this subject Not only has a large array of current measurement methods been tested concurrently here but a few new approaches have also been developed notably laser measurements of atmospheric CO concentration 2 gradients Another highly useful feature of this book is the addition of monitoring and process studies as well as modeling

**Restoration Ecology** Jelte van Andel, James Aronson, 2012-05-21 Enlarged enhanced and internationalized edition of the first restoration ecology textbook to be published with foreword by Dr Steven Whisnant of Texas A M University and Chair of the Society of Ecological Restoration Since 2006 when the first edition of this book appeared major advances have taken place in restoration science and in the practice of ecological restoration Both are now accepted as key components of the increasingly urgent search for sustainability at global national and community levels hence the phrase New Frontier in the title While the first edition focused on ecosystems and landscapes in Europe this new edition covers biomes and contexts all over the world Several new chapters deal with broad issues such as biological invasions climate change and agricultural land abandonment as they relate to restoration science and ecological restoration Case studies are included from Australia North America and the tropics This is an accessible textbook for senior undergraduate and graduate level students and early career scientists The book also provides a solid scientific background for managers volunteers and mid career professionals involved in the practice of ecological restoration Review of the first edition I suspect that this volume will find its way onto the shelves of many restoration researchers and practitioners and will be used as a key text in graduate courses where it will help fill a large void My own copy is already heavily bookmarked and will be a constant source of research ideas and lecture material Environmental Conservation Companion Website A companion website with downloadable figures is available at [www.wiley.com/go/vanandel/restorationecology](http://www.wiley.com/go/vanandel/restorationecology)
