Supernaturalism in Human Life Jacob Pandian,2002 The Master Plant Andrew Russell,Elizabeth Rahman,2020-06-03 Described as a master plant by many indigenous groups in lowland South America tobacco is an essential part of shamanic ritual as well as a source of everyday health wellbeing and community In sharp contrast to the condemnation of the tobacco industry and its place in contemporary public health discourse the book considers tobacco in a more nuanced light as an agent both of enlightenment and destruction Exploring the role of tobacco in the lives of indigenous peoples The Master Plant offers an important and unique contribution to this field of study through its focus on lowland South America the historical source region of this controversial plant yet rarely discussed in recent scholarship The ten chapters in this collection bring together ethnographic accounts key developments in anthropological theory and emergent public health responses to indigenous tobacco use Moving from a historical study of tobacco usage covering the initial domestication of wild varieties and its value as a commodity in colonial times to an examination of the transcendent properties of tobacco and the magic symbolism and healing properties associated with it the authors present wide ranging perspectives on the history and cultural significance of this important plant The final part of the book examines the changing landscape of tobacco use in these communities today set against the backdrop of the increasing power of the national and transnational tobacco industry The first critical overview of tobacco and its uses across lowland South America this book

encourages new ways of thinking about the problems of commercially exploited tobacco both within and beyond this source region

Myth of the Modern Hero Jane L. Bownas, 2017-11-21 The idea of the hero originates in myths from the distant past and has been applied to many different concepts in different societies cultures and historical time periods As a mythical signifier the meaning of the word hero changes according to the intentions of the user and this study examines some of the ways in which heroic myths have been created either to justify the actions of those in power or to produce an imaginary ideal to which the majority can aspire The warrior heroes of Greek legend fighting for individual glory and honour have little in common with the soldiers fighting in the wars of the twentieth century resulting in the creation of a new hero myth that of the patriotic dutiful and obedient soldier As a result of wars and the emergence of new states there is a need for new myths depicting heroes who fight and if necessary die in order to defend their nation Heroic myths are important for those seeking power and this study considers the extent to which Germanic myths played a part in the emergence of Hitler as a heroic leader In recent times the idea of the hero with which people most readily identify is the extreme altruist someone who is ready to risk their own life to save the life of another person The possible origins of and reasons for such behaviour are examined All humans possess the potential to act in ways which might be considered to be heroic even when this involves living an ordinary life with courage and endurance

The Politics of Storytelling Michael Jackson, 2013-09-12 Hannah Arendt argued that the political is best understood as a power relation between private and public realms and that storytelling is a vital bridge between these realms a site where individualized passions and shared perspectives are contested and interwoven Jackson explores and expands Arendt's ideas through a cross cultural analysis of storytelling that includes Kuranko stories from Sierra Leone Aboriginal stories of the

stolen generation stories recounted before the South African Truth and Reconciliation Commission and stories of refugees renegades and war veterans Focusing on the violent and volatile conditions under which stories are and are not told and exploring the various ways in which narrative reworkings of reality enable people to symbolically alter subject object relations Jackson shows how storytelling may restore existential viability to the intersubjective fields of self and other self and state self and situation
