that even as a theology student Frye's first impulse was always that of the cultural critic. The papers on Calvin Eliot Chaucer Wyndham Lewis and on the forms of prose fiction show Frye as precociously witty, rigorous and incisive, a gifted writer who clearly found his voice before his last undergraduate year. David Lodge wrote in the *New Statesman*: "There are not many critics whose twenty-year-old book reviews one can read with pleasure and instruction, but Frye is an exception to most rules." Northrop Frye's student essays provide pleasure and instruction through their comments on the Augustinian view of history, on beauty, truth and goodness, on literary symbolism and tradition. *The Secret Tradition in Alchemy*, Arthur Edward Waite, 1926. **Zoroaster- the Great Teacher**, Bernard H. Springett, 1923. **The Emerald Tablet**, Dennis William Hauck, 1999-03-01. The Emerald Tablet, an ancient document that contains the essence of the alchemical teachings, has had an important influence on many Western spiritual and religious traditions. Ostensibly concerned with turning base metals into gold, alchemy was in fact dedicated to transforming the lead of self into the gold of spirit. This brilliant history of alchemy traces its sources back to ancient Egypt and presents alchemy as a useful practical system of self-transformation. Each of the seven steps of alchemical transformation is explained with hands-on techniques and exercises, treating alchemy as a living discipline for achieving a spiritual awakening. [Index-catalogue of the Library of the Surgeon-General's Office, United States Army National Library of Medicine \(U.S.\), 1945](#). **The Occult Review**, 1922. **London Forum (incorporating "The Occult Review")**, 1922. *Index-catalogue of the Library of the Surgeon General's Office, United States Army (Army Medical Library)*, Army Medical Library (U.S.), 1945. **The Marriage of Heaven and Earth**, Randall A. Clack, 2000-08-30. From the Middle Ages to the close of the 17th century, alchemy was fundamental to Western culture as scores of experimenters sought to change lead into gold. Though its significance declined with the rise of chemistry, alchemy continued to captivate the imagination of writers, and its images still appear in modern creative works. This book examines the literary representation of alchemical theory and the metaphor of alchemical regeneration in the works of Edward Taylor, Edgar Allan Poe, Nathaniel Hawthorne and Margaret Fuller. While Taylor used alchemical metaphors to illustrate the redeeming grace of God upon the soul, these same metaphors were used by Poe, Hawthorne and Fuller to depict a broader concept of redemption. These later writers used alchemical imagery to describe both the regeneration of the individual and the possible transformation of society. For Poe, alchemy became a metaphor for the transforming power of imagination; for Hawthorne, it became a means of representing the redeeming power of love; for Fuller, it figured the reconciliation of gender opposites. Thus, these four American writers incorporated the idea of regeneration in their works, and the tropes and metaphors of the medieval alchemists provided a fascinating way of imagining the transformative process. **Ramon Llull's New Rhetoric**, Mark D. Johnston, 2020-08-13. Modern histories of medieval culture often assert without qualification that the oral exercise of public eloquence during the European Middle Ages was limited to preaching by the clergy. The classical art of rhetoric supposedly survived only as a written subject for study in the schools. During the past thirty years, however, knowledge of

medieval rhetorical theory and practice has grown tremendously. Historians and philologists have devoted particular attention to the relationship between oral and written communication in medieval Europe. Their investigations are beginning to suggest not surprisingly that interest in eloquence was not confined to the schools or clergy. Secular officials arguing in princely courts or town halls and laypeople seeking to develop their learning or piety also cultivated an interest in rhetoric. Given the paucity of testimony available, the *New Rhetoric* of the Mallorcan lay theologian and philosopher Ramon Llull (1232-1316) offers an exceptional witness to the non-academic and non-clerical concern for eloquence. His proposals for new Christian arts of communication are among the best evidence available for assessing the diffusion of rhetorical doctrines from the cloisters and schools into the courts, town halls, and private chapels of Western Europe around 1300. Growing interest in Llull's work and in medieval rhetoric have combined to produce this first published edition. The first part on order shows how Llull's entire program attempts to correlate ethical, metaphysical, and linguistic categories into a single system of Anselmian rightness. The next section on beauty could almost form a complete art of preaching in itself thanks to the brief compilations of sermon material that it includes. The broad range of discursive elements and techniques in which Llull seeks verbal beauty makes this section very eclectic in scope. Part three on knowledge attempts to explain the diffusion of right linguistic and rhetorical doctrine almost exclusively through the *Divine Dignities* and other categories of the *Great Art*. The final section on love consists of ten proverbs regarding loving speech, each explicated with an appropriate exemplum.
