released from productive ends in the pursuit of leisure But this is more than just a book about how architecture has incorporated play into its spaces and structures it is a history of the modern city itself The ludic imagination impregnated modernist ideals and what begins with the playground ends with a re consideration of the whole sweep of the modern movement through the filter of leisure and play Because play is such a basic or fundamental human experience the book re grounds the architect s concerns with those of non architects and not only those of adults but also of children It seeks to give everyone architects and other ordinary city dwellers alike a better understanding about what is at stake in the making of the public spaces of our cities

Concise New Makers of Modern Culture Justin Wintle, 2008-11-28 A Who's Who of Western culture from Woody Allen to Emile Zola. Containing four hundred essay style entries and covering the period from 1850 to the present. The Concise New Makers of Modern Culture includes artists, writers, dramatists, architects, philosophers, anthropologists, scientists, sociologists, major political figures, composers, film makers and many other culturally significant individuals and is thoroughly international in its purview. Next to Karl Marx is Bob Marley, with John Ruskin is Salman Rushdie, alongside Darwin is Luigi Dallapiccola. Deng Xiaoping rubs shoulders with Jacques Derrida as do Julia Kristeva and Kropotkin. With its global reach, The Concise New Makers of Modern Culture provides a multi-voiced witness of the contemporary thinking world. The entries carry short bibliographies and there is thorough cross referencing as well as an index of names and key terms. Ideas + Buildings Carl Knutson, Ron Stelmarkski, 2008 Perkins Will, a global architecture and design practice, releases the first volume in a series of publications showcasing the talent of its teams and scope of their projects. Ideas Buildings defines the essential characteristics of innovation and excellence that make Perkins Will unique among architecture firms worldwide. The Ideas Buildings series will include essays on design theory, white papers on programmatic and technological innovation, client business issues and the environment, and ideas that relate directly to the practice and its work as well as broader social and cultural issues. Ideas Buildings Collective Process: Global Social and Sustainable Design includes 12 unique projects along with anecdotal information about the firm and its history, providing insight into the firm who they are and what they do. The book demonstrates the progress and energy of Perkins Will as the firm advances towards its 75th anniversary. **Archis**, 2004 **exlibris** Giovanni Corbellini, 2022-05-18 Architects write a lot, especially now, when conceptual aspects have become central in the advanced reflections and narrative forms increasingly intersect the quest of design practices for an ultimate legitimization. In the growing mass of the publishing offer, these keywords try to highlight recurrent issues, tracking synthetic paths of orientation between different critical positions, with particular attention to what happens in the neighbouring fields of the arts and sciences. *Drawing Parallels* Ray Lucas, 2019-04-29 *Drawing Parallels* expands your understanding of the workings of architects by looking at their work from an alternative perspective. The book focuses on parallel projections such as axonometric, isometric and oblique drawings. Ray Lucas argues that by retracing the marks made by architects, we can begin to engage more directly with their practice as it is only by redrawing the work that hidden aspects are revealed. The practice of drawing offers significantly different insights, not easily accessible through discourse analysis, critical theory or observation. Using James Stirling, JJP Oud, Peter Eisenman, John Hejduk and Cedric Price as case studies, Lucas highlights each architect's creative practices, which he analyses with reference to Bergson's concepts of temporality and creativity, discussing their manner in which creative problems are explored and solved. The book also draws on a range of anthropological ideas, including skilled practice and enchantment, in order to explore why axonometrics are important to architecture and questions the degree to which the drawing convention influences the forms produced by architects. With 60

black and white images to illustrate design development this book would be an essential read for academics and students of architecture with a particular interest in further understanding the inner workings of the architectural creative process
