Affect Theory and Comparative Education Discourse Irving Epstein, 2019-07-11 What does educational policy making and institutional practice entail in an era of globalization Global interactions challenge conventional assumptions governing the certainty of geographical boundedness simplistic notions of citizenship and identity fixed notions of time space and movement and clear distinctions between economic modes of production and consumption Irving Epstein argues that conventional educational institutions and the policies that support them tend to ignore such anxiety by affirming a belief in educational modernism to the exclusion of other possibilities What is missing in most of these analyses is an appreciation for the role of affect in determining how our encounters with these practices become significant and how our efforts to find meaning in those policies and practices lead to their acceptance or rejection This book is the first application of affect theory to comparative education themes and shows how it can help to form a more robust discussion of the policy making process and the popular reactions to it After discussing the key concepts associated with affect theory he presents a total of six case studies Three of the cases depict relationships between educational cultural and social organizations whose purposes conflict with one another but whose presence is indicative of a loss of faith in the efficacy of public schooling Three of the cases are illustrative of an even greater systematic rejection of educational institutional aim and purpose

Carney and Ulla Ambrosius Madsen reimagine the possibilities for the comparative study of education Exploring the experiences of young people in Denmark South Korea and Zambia this book illustrates how these very different contexts are increasingly connected by common narratives of purpose as well as overheated promises of success Focusing on the writings of Jean Baudrillard the authors examine them in the context of works by other theorists of modernity to explore processes of simulation and disappearance that are shaping life worldwide In the process the authors paint a rich portrait of education and schooling as a site of joy hope pain and ambivalence Encompassing both theoretical and methodological innovation Education in Radical Uncertainty provides inspiration for scholars and students attempting to approach the fields of comparative education education policy and youth studies anew

Lanka and Bangladesh It sheds light on the differences between the trajectories of the in firm skill formation regimes of the two countries and reveals the important part that varying paths of educational development in both countries have played in shaping these trajectories At the same time the study shows how in both countries state led skill formation regimes have been transformed not only by market forces and the growing importance of corporate business interests but also by the social demand for educational credentials

Reimagining Japanese Education David Blake Willis,Jeremy Rappleye,2011-05-16 Sparked by the confluence of accelerating domestic transformation and increasingly explicit impacts from globalization the Japanese education system has undergone tremendous changes during the turbulence of the past decade This volume which brings together some of the foremost scholars in the field of Japanese education analyzes these recent changes in ways that help us reimagine Japan and Japanese educational change at this critical juncture Rather than simply updating well worn Western images of Japan and its educational system the aim of the book is a much deeper critical rethinking of the outmoded paradigms and perspectives that have rendered the massive shifts that have taken place in Japan largely invisible to or forgotten by the outside world This reimagining thus restores Japan to its place as a key comparative link in the global conversation on education and lays out new pathways for comparative research and reflection Ranging widely across domains of policy and practice and with a balance of Japanese and foreign scholars the volume is also indicative of new directions in educational scholarship worldwide approaches that center global interactions on domestic education and contribute to a far greater recognition of the polycentric polycontextual World unfolding today This book will be of keen interest to scholars of education worldwide as well as those working in and across anthropology sociology policy studies political science and area studies given that contemporary transformations in Japan at once reflect and approximate political social and educational shifts occurring throughout the World in the early decades of the 21st century
