## **Re Thinking Reason:**

**Re-Thinking Reason** Kerry S. Walters, 1994-09-08 For two decades colleges and universities have regularly offered and in some cases required courses in thinking skills. Such courses generally have focused on training students in the basics of informal and formal logic, the assumption being that good thinking is logical thinking and that instruction in critical or good thinking consequently should emphasize logical procedures. This logistic assumption is clearly reflected in both critical thinking textbooks as well as in the professional literature. Recently, however, the epistemic and pedagogical identification of critical thinking and logical thinking has been questioned by educators from a wide diversity of disciplines. Many of these critics argue that a richer, more comprehensive model of thinking itself is needed, one that acknowledges the importance of traditionally downplayed faculties such as empathy, imagination, and insight. Others contend that thinking skills theory and pedagogy must take into consideration the contextual and sometimes political influences upon not just content but also styles of thinking. Finally, still other critics of the conventional model of critical thinking argue that recent research in feminist studies sheds a great deal of light upon the directions in which critical thinking instruction should go. The fourteen essays in this anthology all illustrate this new way of thinking about critical thinking. Each of them is critical of the received model and each of them argues for one that goes beyond the conventional reduction of thinking skills to logical expertise. But each approaches the issue from a different angle, thereby providing the reader with a diversity of perspectives and accents. **Re Thinking Reason** is an invaluable resource, tool, research guide, and supplemental textbook for educators across the disciplines who are concerned with incorporating thinking skills instruction in their classes. Re-Thinking Reason Kerry S.

Walters, 1994-01-01 Challenges the widespread assumption that good thinking is logical thinking and that college students should learn better after taking a course in critical thinking. The 14 contributors argue for and provide a richer model of thinking that acknowledges the importance of faculties traditionally downplayed or discouraged. Addressed to educators.

**Rethinking Law as Process** draws on insights from process philosophy in order to rethink the nature of legal decision making.

**Rethinking Feminist Ethics** Daryl Koehn, 2012-10-12 The question of whether there can be a distinctively female ethics is one of the most important and controversial debates in gender studies philosophy and psychology today. **Rethinking Feminist Ethics: Care, Trust, and Empathy** marks a bold intervention in these debates and bridges the ground between women theorists disenchanted with aspects of traditional ethics and traditional theories that insist upon the need for some ethical principles. Rethinking Imagination Gillian Robinson, John F. Rundell, 2016-01-28 Pulling together a collection of richly informative essays, **Rethinking Imagination** addresses competing sets of ideas oscillating between the modern and post-modern, creativity and sublimity, progress and apocalypse, democracy and redemption, Enlightenment and Romanticism, and reason and imagination. Aiming to thematize these debates from the perspective of the imagination, **Rethinking Imagination**

takes two directions The first addresses a socio cultural interpretation in which the distinguishing figures of modernity can be viewed as continuing differentiation and autonomization of spheres and systems that goes well beyond the divisions of labour The second is an ongoing philosophical discourse about the imagination and its relation to reason which has been present since Enlightenment Divided into two separate yet interconnected parts this book is a highly significant collection of essays and a valuable contribution to the field of philosophical and socio cultural sociology It is a key book for undergraduate postgraduate and academic researchers

**Rethinking Reprogenetics** Inmaculada de Melo-Martin,2016-10-03 Reprogenetic technologies which combine the power of reproductive techniques with the tools of genetic science and technology promise prospective parents a remarkable degree of control to pick and choose the likely characteristics of their offspring Not only can they select embryos with or without particular genetically related diseases and disabilities but also choose embryos with non disease related traits such as sex Prominent authors such as Agar Buchanan DeGrazia Green Harris Robertson Savulescu and Silver have flocked to the banner of reprogenetics For them increased reproductive choice and reduced suffering through the elimination of genetic disease and disability are just the first step They advocate use of these technologies to create beings who enjoy longer and healthier lives possess greater intellectual capacities and are capable of more refined emotional experiences Indeed Harris and Savulescu in particular take reprogenetic technologies to be so valuable to human beings that they have insisted that their use is not only morally permissible but morally required Rethinking Reprogenetics challenges this mainstream view with a contextualised gender attentive philosophical perspective De Melo Mart n demonstrates that you do not have to be a Luddite social conservative or religious zealot to resist the siren song of reprogenetics Pointing out the flawed nature of the arguments put forward by the technologies proponents Rethinking Reprogenetics reveals the problematic nature of the assumptions underpinning current evaluations of these technologies and offers a framework for a more critical and sceptical assessment

both the strengths and weaknesses of liberal internationalism as a worldview and also explores the competing worldviews that have been generated by the perceived flaws of this perspective Examination of crucial policy issues is incorporated throughout the text restoring the relevance of theory for those who wish to understand those policy issues Moreover this book revitalises the raison d'être of contemporary IR theory and shows the role it can play in making sense of the twenty first century

**Rethinking Islam in Europe** Zekirija Sejdini, 2022-01-19 Islamic theology had to wait a long time before being granted a place in the European universities That happened above all in German speaking areas and this led to the development of new theological and religious pedagogical approaches This volume presents one such approach and discusses it from various perspectives It takes up different theological and religious pedagogical themes and reflects on them anew from the perspective of the contemporary context The primary focus is on contemporary challenges and possible answers from the perspective of Islamic theology and religious pedagogy It discusses general themes like the location of Islamic theology and religious pedagogy at secular European universities The volume also explores concrete challenges such as the extent to which Islamic religious pedagogy can be conceptualised anew how it should deal with its own theological tradition in the contemporary context and how a positive attitude towards worldview and religious plurality can be cultivated At issue here are foundations of a new interpretation of Islam that takes into account both a reflective approach to the Islamic tradition and the contemporary context In doing so it gives Muslims the opportunity to take their own thinking further
