Beyond the Law's Reach? Shmuel Nili, 2024-09-05 Beyond the Law's Reach argues that fundamental assumptions in contemporary political philosophy need to be rethought in the face of pervasive political violence At an applied level Nili develops this claim by delving into a series of specific controversies all revolving around affluent democracies policy responses to the threat of pervasive violence abroad Examples include the ethics of giving refuge to beleaguered autocrats to avert civil war in their country the ethics of prosecuting foreign officials who have colluded with drug cartels and the admission of oligarchs who acquired their riches by distorting their country's rule of law At a more theoretical level the book shows that the moral principles needed to adjudicate these particular controversies can illuminate broader issues in normative political theory These range from the philosophy of criminal punishment through the relationship between the law's letter and its spirit to the general plausibility of certain moral theories and meta theories as public policy guides Ranging from influential theories of justice to some of the hardest moral dilemmas facing communities and leaders struggling with the shadow of violence this book explores the difficult circumstances in which we must aside not just the assumption of a stable liberal democracy but even the dream of a clear path towards such democracy

The Reach of Free Movement Mads Andenas, Tarjei Bekkedal, Luca Pantaleo, 2017-09-26 The reach of free movement within the EU Internal Market and what constitutes a restriction are the topics of this book For many years the tension between free movement and restrictions have been the subject of intense discussion and controversy and this includes the constitutional reach of the rights conferred by the Treaty of Lisbon Anything that makes movement less attractive or more burdensome may constitute a restriction Restrictions may be justified but only if proportionate The reach of free movement is fundamental to the Internal Market both

for the economic constitution and increasingly for individual rights in a European legal order that provides constitutional guarantees for rights exceeding those of free movement. The interaction between fundamental rights and fundamental freedoms to movement distinguishes the EU legal order from the national legal systems. The book falls into four parts: The Reach of Free Movement; Justifications and Proportionality; Fundamental Rights; and Looking Abroad. The clear discussion of the fundamentals and dilemmas regarding the subject of this book should prove useful for academics, practitioners, graduate students as well as EU officials and judges wishing to stay updated on the ongoing scholarly debate regarding relevance to case law.

Mads Andenas is Professor at the Department of Private Law, University of Oslo and at the Institute of Advanced Legal Studies, School of Advanced Studies, University of London. Tarjei Bekkedal is Professor at the Centre for European Law, University of Oslo and the Chair of the Norwegian Association for European Law. Luca Pantaleo is a Lecturer in EU law at The Hague University of Applied Sciences who obtained a PhD in International and EU Law in 2013 at the University of Macerata in Italy and who was previously a Senior Researcher at the T M C Asser Institute and Postdoctoral researcher at the University of Luxembourg.

**Specific to this book:** Up to date analysis of the reach of free movement within the EU Internal Market and what constitutes a restriction. Chapters by leading authorities and a number of young scholars active in various interconnected fields such as European law, Constitutional law and Human Rights law, international law, global governance, European trade and commercial law, European Financial Services law and procedural law. The strength of the content lies both in its highly practical and theoretical applicability.

**REACH Beyond Borders** Ondřej Filipec, 2017-08-23. This book discusses how much other countries reflect the EU chemical regulation REACH (Registration, Evaluation, Authorization, Restriction of Chemicals) in the context of Europeanization theory. The main hypothesis verified in this book is that more trade with the EU means more Europeanization as the non-EU companies exporting to the EU have an obligation to comply with EU rules according to the 'No data, No Market' REACH provision. This book further points out that non-EU companies voluntarily adopt EU standards while this change has yet to be reflected on the policy level in non-EU countries, mainly for economic reasons. Exploring changes in national chemical regulatory policies among top chemical producers around the World brings new ideas into the process of Europeanization behind EU borders and provides useful material for academia.
