Askin, 2022-06-30 By integrating conversations across disciplines especially focusing on classical studies and Jewish and Christian studies this volume addresses several imbalances in scholarship on reading and textual activity in the ancient Mediterranean Contributors intentionally place Jewish Christian Roman Greek and other reading circles back into their encompassing historical context avoiding subdivisions along modern subject lines divisions still bearing marks of cultural and ideological interests In their examination contributors avoid dwelling upon traditional methodological debates over orality vs literacy and social classifications of literacy instead turning their attention to the social historical groups of people circles and networks strata and class scribal culture material culture epigraphic and papyrological evidence functions and types of literacy and the social relationships that all of these entail Overall the volume contributes to an emerging and important interdisciplinary collaboration between specialists in ancient literacy encouraging future discussion between two currently divided fields

Security and Persistence John Rosenberg,J.Leslie Keedy,2012-12-06 During a short visit to Bremen in December 1989 John Rosenberg had several discussions with me about computer architecture Although we had previously worked together for more than a decade in Australia we had not seen each other for over a year following my move to Bremen in 1988 Meanwhile John was spending a year on study leave at the University of St Andrews in Scotland with Professor Ron Morrison and his persistent programming research group From our conversations it was quite clear that John was having a most fruitful time in St Andrews and was gaining valuable new insights into the world of persistent programming He was very keen to explore the significance of these insights for the MONADS Project which we had been jointly directing since the early 1980s MONADS was not about persistent programming In fact it had quite different origins in the areas of software engineering and information protection In an earlier stage of the project our ideas on these themes had led us into the world of computer architecture and even hardware design in our attempts to provide an efficient base machine for our software ideas The most important practical result of this phase of the project had been the development of the MONADS PC a mini computer which would be better compared with say a V tv
