The Shapes of Early English Poetry Eric Weiskott, Irina Dumitrescu, 2019-04-01 This volume contributes to the study of early English poetics In these essays several related approaches and fields of study radiate outward from poetics including stylistics literary history word studies gender studies metrics and textual criticism By combining and redirecting these traditional scholarly methods as well as exploring newer ones such as object oriented ontology and sound studies these essays demonstrate how poetry responds to its intellectual literary and material contexts The contributors propose to connect the small syllables words and phrases to the large histories emotions faiths secrets In doing so they attempt to work magic on the texts they consider turning an ordinary word into something strange and new or demonstrating texture difference and horizontality where previous eyes had perceived only smoothness sameness and verticality

Language, Sign, and Gender in Beowulf Gillian R. Overing, 1990 This is not a book about what Beowulf means but how it means and how the reader participates in the process of meaning construction to this end it is a bringing together of contemporary critical theory and Old English poetry Overing's primary aim is to address the poem on its own terms to trace and develop an interpretive strategy consonant with the terms of its difference from all other poems Beowulf's arcane structure describes cyclical repetitions and patterned intersections of themes that baffle a linear perspective the structure suggests instead the irresolution and dynamism of deconstructionist freeplay of textual elements
