READING COMPREHENSION STRATEGIES

WORKSHOP

Learning Outcome

You will be able to use a wide range of reading comprehension strategies to link to previous knowledge and to enhance the reading comprehension ability from simple to more complex processes (A1-B2).

ACTIVITY 1

Answer the following questions:

1. Have you ever had the experience of reading a text but not remembering what you have just read.
2. Why is reading comprehension important?
3. What reading comprehension strategies do you know?
4. Which strategy is the most powerful to you? Why?

ACTIVITY 2

Match the reading comprehension strategies to their definition.

1. PREDICTING	a) They, also known as transition words or linking words, are words or phrases used to connect and organize ideas within a text. They help readers follow the flow of information and understand the logical relationships between sentences and paragraphs. Examples of connectors include "therefore," "however," "in addition," "for example," and "on the other hand."
2. SKIMMING	b) It is a reading strategy that involves searching a text for specific information or details. Instead of reading the entire text, the reader scans for keywords, phrases, or specific pieces of information that are needed. It is particularly useful when looking for answers to specific questions or when trying to locate particular facts within a text.
3. SCANNING	c) These are words or phrases within a text that refer back to something previously mentioned in the text. These words help establish connections and clarify relationships between different parts of the text. These words include pronouns (he, she, it, they), demonstratives (this, that, these, those).
4. REFERENCE WORDS	d) It is the process of drawing conclusions or making inferences based on information provided in the text. Readers use context clues, background knowledge, and explicit details to make inferences about characters, events, or the author's intentions
5. CONNECTORS	e) It is a reading strategy where the reader quickly glances over the text to get a general sense of its content without reading every word. The goal of skimming is to identify key information, such as the main ideas, headings, and keywords, while ignoring less important details.
6. INFERRING	f) It involves making educated guesses about what might happen next in the text based on prior knowledge and clues from the text. It helps readers engage with the material and anticipate the direction of the content.
