This is a story about the relationship between an old man and a red tailed hawk that fell from its nest and how he saved the hawk from being eaten by a six foot long rattlesnake and how the hawk was able to return the favor by saving the old man s life The old man born in the 1900s and raised on a farm in Wakulla County Florida was not a big fan of the red tailed hawks The common name of a red tailed hawk is a chicken hawk because they are known to kill and eat small chickens a farmer s worst nightmare The story also shares with the reader how over the next twenty five years the hawk and the old man built an everlasting bond that surprised the old man s wife and their children a bond that could not be broken even in death My reason for writing this book was to show the reader that we are all God s children and that each one of us has a chance to do and become anything we want to do if we work hard and long enough and with God s help we will achieve whatever we want to do in life **Buzz, Ruby, and Their City Chicks** Wendy Drexler,Joan Fleiss Kaplan,2016-09-21 Three chicks hatch on the ledge of an office building What will happen to them Follow the adventures of Buzz Ruby and their city chicks in this true life story

Schlater,2019 Red tailed Hawks *Buteo jamaicensis* are an extremely abundant and adaptable raptor species that inhabit a wide range across North America Their ability to persist in areas of intensive agricultural practices makes them an ideal raptor species to study in south central Nebraska USA I studied Red tailed Hawks using roadside raptor surveys and GPS transmitter location data I determined habitats of high use by Red tailed Hawk had taller vegetation during the winter and fall while low use sites in the summer had denser vegetation This suggests that Red tailed Hawks prefer hunting in habitat with higher vegetation but select against habitat where the vegetation is too dense and obstructs their view GPS transmitter location data reported breeding Red tailed Hawks have the smallest breeding season home range followed by nonbreeders with a single territory and nonbreeders with multiple territories reported the largest home ranges The presence of both resident and migratory nonbreeders suggests multiple life history strategies for

nonbreeding raptors in an attempt to acquire both resources and a successful breeding habitat Last by combining GPS location data with roadside raptor survey data we were able to speculate that increased Red tailed Hawk sightings in the winter evenings could be explained by GPS transmitter tracked Red tailed Hawks decreased presence in canopy cover and increased movement during the evenings These findings have significant implications for future management of Red tailed Hawks and the methodology of integrating both observational and GPS location data Crimson and Grey Michael P.
