Over the last few decades circuits of capital have been stretched through processes of economic globalization leading to complex and hybrid outcomes that result in different modes of production and consumption Understanding these new economic configurations and their geographic patterns requires incorporating new theoretical arguments based on for example chain and network concepts This edited volume brings together theoretically informed analysis from Asia Europe and North America to illustrate the way in which new economic configurations have been developed and to understand individual local and regional responses to a variety of global challenges threats and opportunities The different examples presented illustrate that economic structures and flows have changed dramatically over the past decades with profound impacts for the economic and regional actors involved **Employment Location in Regional Economic Planning** G. M. Lomas,P. A. Wood,2017-09-05 Originally published in 1970 During the times of planned population movements and new towns with a growing interest in specifically regional policies by government this book considers the problems of development within regions It presents research on the facts and trends of employment generated by the regional economy and its relationship with the size and socio economic character of local workforce using the example of the West Midlands as testing ground for policy The authors come from the viewpoint of needing to develop understanding of population housing employment and communications the way our regional economy and society worked before organised de centralisation could be planned appropriately Within the field of economic planning they ask what analysis of the information available tell us about development possibilities within a region The book looks at trends in employment growth the character and distribution of manufacturing industries and service industries and the locational consequences to build a picture of the regional economic system It then considers supply and demand and measures the ways towns vary in detailed case studies
