Serene Urbanism Phillip James Tabb,2016-09-13 Serenity is becoming alarmingly absent from our daily existence especially within the urban context Time is dense and space is tumultuous The idea of the serene has gained currency in postmodern discussions and when combined with urbanism conjures questions even contradictions as the two ideas seem improbable yet their correspondence seems so inherently desirable Integrated these two constructs present design challenges as they manifest in differing ways across the rural urban transect In response Part I of this book establishes the theoretical framework through different contemporary perspectives and concludes with a clear explanation of a theory of serene urbanism The positive characteristics of urbanism and beneficial qualities of the serene are explored and related to sustainability biophilia placemaking and environmental design Both principles and examples are presented as compelling portraits for the proposal of these new urban landscapes Part II of the work is an in depth exploration and analysis of serene urban ideas related to the intentional community being created outside of Atlanta Georgia USA Serenbe is the name given to this place to commemorate the value and nuance between the serene

and urban *Society and Medicine* Renée Claire Fox, Carla M. Messikomer, Judith Pound Swazey, Allen Glicksman, 2003

The essays in this volume pay tribute to the achievements of Rene C Fox in the fields of medicine and sociology. Many of the contributors are Fox's colleagues and former students from medicine, sociology, nursing, and bioethics. The title *Society and Medicine* reflects the leitmotif in Fox's work: her studies of and teaching about the nature of medicine and medical research, the training and work of their practitioners, the interrelationships between medicine and the societies and cultures of which it is a part, and above all, the moral and spiritual dimensions of the healing arts.

The Fiction of Ruth Rendell Barbara Fass Leavy, 2012-08-31

A study of the role of family in ancient Greek narratives and the psychological theories of Freud and Jung in the mystery novels of Ruth Rendell. Aside from Ruth Rendell's brilliance as a fiction writer and her appeal to mystery lovers, her books portray a compelling universal experience that her readers can immediately relate to: the intra-familial stresses generated by the nuclear family. Even those who experience the joys as well as pains of family life will find in Rendell the conflicts that beset all who must navigate their way through the conflicts that beset members of the closest families. Barbara Fass Leavy analyzes the multi-leveled treatment of these themes that contributes to Rendell's standing as a major contemporary novelist. Rendell, who also writes as Barbara Vine, draws on ancient Greek narratives and on the psychological theories of Sigmund Freud and Carl Jung, derived from them, to portray the disturbed family relationships found throughout her work. Leavy's analysis considers what distinguishes mysteries as popular entertainment from crime fiction as literary art. The potential for rereading even when the reader remembers whodunit will be the basis for this distinction. Leavy also looks closely at the Oedipus and Electra complexes and how they illuminate Rendell's portrayals of the different pairings within the nuclear family, for example, mother and daughter, and considers the importance of gender differences. In addition, Leavy corrects a widespread error: that Freud formulated the Electra complex when in fact the formulation was Jung's, as he challenged Freud's emphasis on the Oedipus story as the essential paradigm for human psychological development.
